Subject: Proposed Agenda for PPG Meeting 03/07/2019

Hi Everyone,

Below you will find a proposed agenda for tomorrow's meeting and a summary of our last small group meeting on 02/27. If there is anything else you would like to add to the agenda let me know, or we can do agenda repair tomorrow.

Agenda

1. Discuss and summarize the status of the site,
2. Develop a strategy to improve communication, and
3. Define work remaining and next steps.

02/27/2019 PPG Meeting Summary
Zach Sasnow, Eric Amadi, Angie Carey

- EPA provided a brief description of the site history and remedial work.
- In 2018, the Statement of Basis had been developed and the EPA was in the process of issuing a final decision when they discovered that additional monitoring work was ongoing at the site.
- A spill reported to the DNR in 2002 was recorded under BRRTS# 04-41-526909 and the activity transferred to the existing project under BRRTS# 02-41-241728.
- The DNR has received spill-related semi-annual monitoring reports prepared by PPG's consultant, Tetra Tech, however these reports continue to be addressed to the former DNR project manager (PM).
- The current EPA PM has not received these reports, and it is unclear the extent to which the former EPA PM received them.
- There are concerns regarding the spill-related monitoring work with respect to the list of contaminants included in the scope of work, the number and placement of wells, and the extent of contamination.
- The DNR and EPA recognized that a lack of communication resulted in an incomplete understanding of the site conditions, and that additional work and continued monitoring will be required.

Thanks,

We are committed to service excellence.
