Attachments: Form 4400-225_FM ECT.pdf; Attachment to 440-225_FM ECT.pdf

Mr. Beggs,

I was talking with Rick Joslin about a situation at our plant where we were removing a chromium plating line, And he recommended that you were the best person to talk with. He additionally recommended that we fill out a Notification for Hazardous Substance Discharge (non-emergency) Form # 4400-225. I am attaching that form along with a copy of the soil and ground water testing results we received from our environmental consultant (ETC). My supervisor and I would like to talk with you face to face this coming Monday if it meets with your schedule about our test results.

Again, We were talking with Rick Joslin and he directed us to you for additional help.

Thanks

Terry A. Farr
