Dear Mr. Hnat:

In response to your letter dated March 5, 2009 NTC Services has completed four quarters of groundwater sampling events, Over-excavation, Soil Boring/sampling and Monitoring well installation. All that remains is re-sampling Soil at monitoring well locations MW-8 & 9 and submitting the soil samples to the lab for Naphthalene analysis. If all goes as planned I will have a geo-probe on site on Thursday of next week. Samples to the lab by March 20, 2009 and results back by April 1, 2009. It will take me approximately 15 days to write the report. I would like to set a deadline of April 30th, 2009. If you have any questions call me at 262-404-1131.

Sincerely,

Daniel R. Huffaker
