Dear Mr. Nestingen:

On April 12, 2019, the Wisconsin Department of Natural Resources (DNR) received a 'Post Closure Modification Request' (PCM) request, submitted on your behalf by Pioneer Environmental, Inc., for the property described above. A cap maintenance plan was established for this property as part of the November 9, 2012 case closure which requires prior DNR approval for modifications made to the capped area.

The PCM consisted of a disturbance of the existing barrier cap as part of a complete redevelopment of the site. This included demolition of the existing building and canopies as well as removal of the former underground storage tank (UST) system and its associated piping and dispensers. The redevelopment included construction of a new convenience store building and two canopy structures, installation of a stormwater retention pond, semi-truck weight scale, and new UST system and its associated piping and dispensers. The required barrier cap area was replaced with new concrete. A total of 3,300 tons of contaminated soil were excavated during the project and properly disposed of at Waste Management's Orchard Ridge RDF facility in Menomonee Falls, WI. On December 18, 2019, the DNR received final documentation of the completed cap modification.

Information received with the PCM request and documentation of completion will be uploaded to the DNR BRRTS database. All requirements in the case closure letter are still in effect. Please continue to conduct annual inspections and maintain the Continuing Obligations Inspection and Maintenance Log included in the site's maintenance plan.

The DNR appreciates your cooperation in meeting the continuing obligations related to this closed case. Please contact me at (414) 263-8680 or by email at david.hanson@wisconsin.gov if you have any questions or concerns regarding this letter.

Sincerely,

David Hanson
