

Pike River Unnamed Tributary

Road Salt Monitoring Data Summary September 2011 –December 2012

Photo courtesy of Jim Beecher

Volunteers: Rachel Martin, Tom Baran, and Jordan Burkholder

Specific conductance summary:

- 6 measurements taken
- Minimum: 1080 $\mu\text{S}/\text{cm}$ on 3/12/2012
- Maximum: 1455 $\mu\text{S}/\text{cm}$ on 2/17/2012
- Mean: 1273 $\mu\text{S}/\text{cm}$

Chloride (Cl^-) summary:

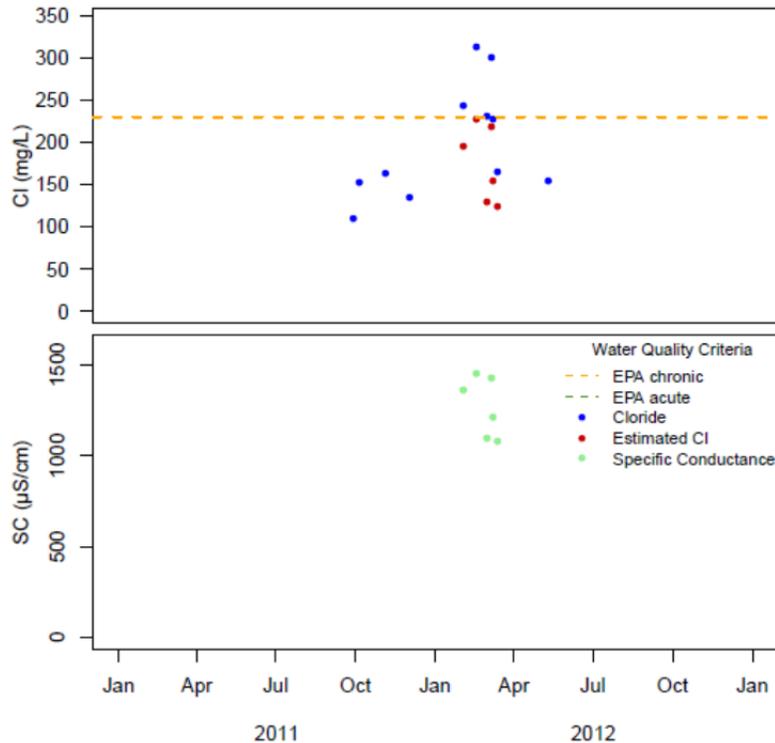

- 11 samples collected
- Minimum: 110.3 mg/L on 9/28/2011
- Maximum: 312.6 mg/L on 2/17/2012
- Mean: 199 mg/L

EPA Acute and Chronic Exceedences for Chloride¹:

The EPA acute chloride standard of 860 mg/L was not exceeded at this site in 2011 or in 2012. However, the EPA chronic chloride standard of 230 mg/L was exceeded at this site four times in 2012:

- 230 mg/L on 2/29/2012 (measured)
- 243 mg/L on 2/2/2012 (measured)
- 300 mg/L on 3/5/2012 (measured)
- 313 mg/L on 2/17/2012 (measured)

Results Over Time²:

¹ Acute standard: The one-hour average should not exceed 860 mg/L more than once every three years. Chronic standard: The four day average should not exceed 230 mg/L more than once every three years. Source: EPA. 1988. Ambient Water Quality Criteria for Chloride. EPA 440/6-88-001.

² Calculated chloride: When $\text{SC} > 1540 \mu\text{S}/\text{cm}$ was $\text{Cl} = 0.3441 * \text{SC} - 291$, $\text{adjR}^2 = 0.98$; when SC was $\leq 1540 \mu\text{S}/\text{cm}$ was $\text{Cl} = 1.044 * (\exp(0.001609 * \text{SC} + 3.046))$, $\text{adj R}^2 = 0.65$. Equations based on data from both Madison and Milwaukee.
