Subject: Harley Davidson Motor Co. SIWP BRRTS # 02-41-586501

Hello Adam,

I have reviewed the SIWP for Harley Davidson Motor Co. with the peer review team and have a request for revisions to share with you:

1. Two separate BRRTS cases need to be opened for this site as the releases appear to be unrelated. There should be a case for the chlorinated impacts and a case for the PAHs.
2. Please provide a figure that shows the location of other spills and soil/groundwater plumes from the other BRRTS cases so that they can be visualized in relation to the proposed boring/well placement.
3. Please use historic data to determine groundwater flow and determine if proposed well placement is appropriate.
4. A boring should be placed east of B3 to delineate east of this location.
5. A monitoring well at the proposed soil boring location south of B2 should be installed if screening indicates contamination.
6. Please provide utility information near B7.
7. A monitoring well should be installed at B7.

If you have any questions regarding these requests please let me know.

Thank you,

Hera
