- [ ] Incident Investigated
- [ ] Enforcement Action Taken
- [ ] Measures Taken by DNR to See That Person Responsible for the Incident Performs Cleanup.
- [ ] Cleanup Measures Taken by DNR to Protect the Environment
- [ ] Other Action (Specify)_____

Additional Remarks Information from Orville Schultz - Fire Chief and Dale Rooter - Director of Public Works, indicates that a gasoline odor was first noticed

Additional Remarks Continued:

in the downtown area near the Parkos Gas Station around the 18th of March. An investigation by the City personnel and a representative from DILHR found the leaking underground gasoline tank. The tank was dug up and removed on March 29, 1977.

Gas continues to seep into a manhole which contains a valve for a city watermain near the gas station. The manhole is periodically pumped by the City personnel into a tank truck and hauled to a land disposal site. The fire department then applies foam to the manhole to prevent a possible ignition of the remaining gas fumes. Reportedly no gasoline has reached any surface waters and no wells are located near the spill site or disposal site.
