3. REMARKS

PART IX - SUMMARY OF EVENTS *(Include list of enclosures)*

At 1422, 9 July 1981, this office was notified of a spill at the vessel Fred R. White, Jr. PO3 GILBERT and LTJG OVERTON were dispatched to investigate. When we arrived there was a sheen of oil on the waters of Sturgeon Bay, a U.S. navigable water. On board the vessel we talked to the chief engineer, Mr. Roy Rude, Jr., who stated that the spill was of vegetable oil from the galley grease trap. The oil was pumped over the side through a by pass valve that was open. The sheen dissipated while we were investigating due to weather conditions.

Encl: Statements of J.S. GILBERT and S.J. OVERTON
