P.O. Box 3600
Green Bay, Wisconsin 54303

Reference: Toluene Spill - July 11, 1979 At Akrosil

Dear Jim:

This will confirm my approximate 9:40 a.m. telephone call on July 11, 1979 to inform you that Akrosil had experienced a toluene spill while the delivery truck was being unloaded.

A Milwaukee Solvent's truck delivered approximately 1,500 gallons of toluene to Akrosil the morning of July 11, 1979. The solvent was being transferred to 55 gallon drums when the fill nozzle failed in the open position shortly after 9:15 a.m. As a result, about 20 gallons of toluene overflowed the drums before the main shut off valve on the truck could be closed. The spilled toluene spread about 10 feet out onto the blacktop in the area. The toluene spill was contained in this area and the material evaporated into the atmosphere rapidly. None of the toluene got anywhere near the Lower Fox River.

Sincerely,

A. H. Martin

June 14, 1979

Mr. George Holzknecht
Riverside Paper Corp.
800 South Lane Street
Appleton, WI 54911

Dear Mr. Holzknecht:

You prompt notification of the spill event was appreciated. Enclosed is the spill incident report form I mentioned during our telephone conversation on June 13, 1979. Fill in those portions of the form that you can, I have filled out the remaining information.

I do have one request in addition to the spill form. Would you please send me a copy of the analysis performed on that days' composite effluent sample? The data can be used to justify the conclusions about the potential hazards.

If you have any questions, please call me at 414/497-4054.

Thank you,

Doug Rossberg
