Subject: Non-Emergency Immediate Action Report
Petroleum distillate
Wisconsin Central, LTD
2 Harrison Street
North Fond du Lac, WI
Clearwater Environmental, Inc. Project Number 07CN99

Dear, Mr. Moeller

The purpose of this report is to document immediate actions conducted to remedy a petroleum distillate release on May 28, 2007.

Approximately 5 gallons of petroleum distillate was released from a leaking valve on a rail tank car onto rail road ballast. Valve was repaired immediately by rail road personnel.

IMMEDIATE RESPONSE ACTION

On May 28, 2007, Wisconsin Central Ltd. (WC) reported a release of approximately 5 gallons of petroleum distillate to the Wisconsin Department of Natural Resources (WDNR). The release occurred on track number 59 in the middle of the yard. The rail tanker that caused the release had the valve repaired immediately by WC/CN employees.

Clearwater Environmental, Inc. (Clearwater) personnel mobilized to the site on May 29, 2007. Based on visual observations, the petroleum distillate did not migrate below the rail road ballast. There was no product remaining to remediate, the release material had evaporated and left no residue on ballast.

There were no apparent impacts to surface water, groundwater, or private water supply receptors. Groundwater is estimated to be at a depth greater then 5 feet in the area of the release.

The present land use is industrial, and is anticipated to remain industrial in the future.

RECOMMENDATION

The immediate response action is complete and no further action is necessary to respond to this non-hazardous substance release.

If you have any questions, please call (920) 892-8823 or my cell phone (920) 226-0039.

Sincerely,

Chet Tadych
