Subject: **NR 151 Status Report Cover Letter**
Full Farm Assessment and Compliance

Dear Leroy:

I would like to take this opportunity to congratulate you based on a recent resource evaluation conducted by *Paul Backhaus* from the Washington County Land and Water Conservation Division (LWCD). The evaluation conducted indicates that you are currently in **full compliance** with all of the States Minimum Performance Standards and Prohibitions, Subchapter II of Chapter NR 151 - Runoff Management, Wis. Adm. Code. The results of this evaluation are in the attached NR 151 Status Report, which indicates the specific performance standards and prohibitions that are currently being achieved per tract of land that you own and/or operate.

Chapter NR 151, Wis. Adm. Code requires that you maintain this level of compliance regardless of future cost sharing. This will require your continued operation and maintenance of all cropland practices and livestock facilities in accordance with accepted standards of practice. This compliance assessment and determination does not cover performance standards and prohibitions that may become effective in the future. Also, any new cropland practices or facilities initiated or constructed on your farm in the future must comply with all effective performance standards at the time you initiate the change on your farm, regardless of cost sharing.

Your understanding of the information in the attached report is very important, as it will serve as formal documentation used to determine eligibility of cost sharing in the future.

Thank you for your conservation work protecting and improving land and water resources in Washington County. If you have any further questions or concerns, please contact me at the Washington County Land and Water Conservation Division 262-335-4800.

Sincerely,

Paul B. Sebo
