Jason,
There will not be a written response from the department as there was no fee paid for a formal review. So you can proceed with the SI.

Dee,

Should we anticipate a response from DNR on the work plan, or should we plan to proceed with the investigation activities? If we proceed should we wait 30 days from when the Figure 4 was submitted?

Thank you,

Jason

Dee,

I apologize for the delay, but I uploaded Figure 4 for the SIWP to WAMS today.

Thank you,

Jason

Dee,

Also wanted to confirm if you need a hard copy of the report as well? Or will electronic submittal be sufficient?

Thank you,

Jason

Dee,

Thank you for confirming receipt of the SIWP. We will get the report and the new figure uploaded to the DNR portal, and yes the new figure will show the proposed locations of borings and MWs.

Thanks,

Jason

Hi Jason,

Yes I was able to see the SIWP with the previous work that was attached. Hopefully you will be able to down load this into the DNR portal this week. If you want to download the Figure 4 as a separate document you may. I am presuming it will show the locations of the borings/MW wells. Thank you.

Dee,

Just wanted to follow up with another email, as the previous one below I sent at 5:08pm had the very large file SIWP attached to it and wasn't sure if your email account has a max file size allowed. If you didn't receive it please let us know, but I will proceed with submittal of the SIWP through WAMS once I'm approved.

Thank you,

Jason

Dee,

Please find attached the SIWP for the above-referenced site. My request for access to the Document Uploader portal on the WAMS site is still under review, so we're submitting this to you directly for now, and I'll upload through WAMS once I'm approved (hopefully tomorrow).

Also Figure 4 for this SIWP is still under preparation so is not included in this submittal. We will follow up with the completed figure when we have it.

Thank you,

Jason

Lance,
Burns & McDonnell is the consulting firm hired by XPO.

Burns & McDonnell requests the Site Investigation Work Plan submittal deadline of February 1, 2023.

XPO is installing a diesel fuel Aboveground Storage Tank (AST) near the vicinity of the former UST. Once installation is completed, Burns & McDonnell may proceed with the site investigation.

Any questions, please let me know. Thank you,

Gentlemen,

The dept. received a Tank System Site Assessment and Hazardous Waste Notification on July 25, 2022. The dept. followed up with a Responsible Party letter dated August 4, 2022 which stated the states regulation regarding the petroleum contamination. Two parts of the letter state a consulting firm had to be hired within 30 days of the letter or by September 5, 2022 and a Site Investigation Work Plan by October 5, 2022.

I am following up to see what work has been completed regarding this contamination at this site. Thank you for your response.

We are committed to service excellence.
