Good Afternoon Adam,

Thank you for checking. The DNR concurs with Sigma's assessment.

Please contact me if you have any questions.

Thank you,

David

Good morning David,

A question arose this morning from the construction team related to the southeasternmost condo villa area on the former EPEC Polymers property. There will be an excess of topsoil from this NCSA area that cannot be reused between the condo villas within the NCSA. As this area is considered non-impacted as it did not require a cap as part of the VPLE process, the team would like to transport this topsoil to an off-site project location for reuse as exempt (clean) per WDNR guidance document RR-103 (*Exempt Soil Management…*). We believe that this would be appropriate, just wanted

to do a quick check with you to make you aware. We do not believe that a formal approval is needed as the guidance document was written to provide a self-implementing approach to this type of situation. Do you agree with our assessment?

Thank you,

Adam
