

Campbellsport - Fond du Lac County

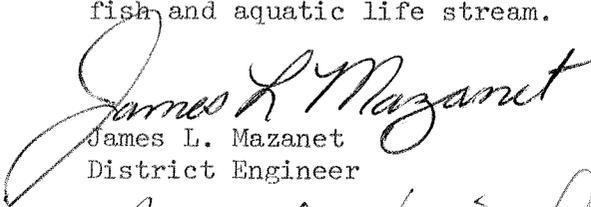

Wastewater Receiving Stream Classification

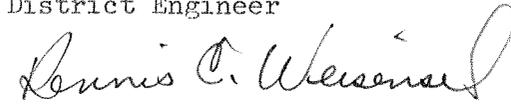

The Village of Campbellsport discharges secondary sewage treatment plant effluent to the Milwaukee River. The Milwaukee River has a ^{.29}7₁₀ of ~~0.10~~ CFS. Biological sampling was conducted on September 18, 1975.

Sampling at the State Highway "67" bridge upstream of the sewage treatment plant indicated a clean water benthic community, whereas downstream sampling indicated sludge banks and a polluted condition. The stream has a rock bottom with many riffle areas.

Recommendations

The Milwaukee River at Campbellsport shall be classified as a continuous, fish and aquatic life stream.
