Subject: Wausau Riverbank Areas

Lisa

I will submit separate Investigation reports for the recent riverbank sampling for each Property/BRRTS (and report the US Post office property).

When stream bank modifications occur, I assume you will want separate reports **and fees** for each BRRTS number.

There will be 4 BRRTS Numbers (Hammerblow, Vacant Lot, US Post Office, Cloverbelt)

If so that would be **$16,600** :

- Review of 4 Site Investigation updates @ $1,050 ($4,200) One fee
- Review of 4 RAPs @ $1,050 ($4,200) One fee
- Review of 4 Remedial Documentation reports @ $350 ($1,400) One fee
- 4 Closure request and GIS Registry Packets , Cap Maintenance Plans @ $1,700 ($6,800) multiple fees.

Can you confirm that this is the approach you want or could they all be combined as one report and review fee?

Called Rick on 1-8-15 to discuss e-mail and best way to handle bank and trail work. Decided that SI, RAP and remedial documentation reports all sites could be combined into 1 report for each phase. One copy, however had to be submitted for each file. Stantec would have to review and modify the City's trail maintenance plan. A copy of the modified plan would have to be submitted for each file. At the time of closure individual closure requests or GIS packets would have to be submitted along with each requisite fee.

L Gutknecht
1-8-15

Thanks,

Rick
