Hi David,
The Bayshore Target will be having some maintenance updates conducted in the basement in January. The floor slab in the southeast corner will have trenching done to remove the concrete floor to gain access to the drain tile pipes which need to be replaced. Hunzinger will be the main contact for this work which is being done to limit moisture on the floor in this area of the basement. Hunzinger will be setting up a system to vent the space the collected any vapors from the trench. The work is schedule for the week of January 13th at the same time the first floor slab on grade portions are having floor cracks sealed.

Thank you,
Heidi
