Dear Ms. Cieslak,

Konicek Environmental Consulting, LLC (KEC) has prepared this addendum to our March 26, 2018 NR 718.12 Exemption Request & Soil Management Plan. The addendum incorporates discussions with yourself and Paul Grittner of the DNR.

The plan submitted in March discussed the placement of the 1,1,1,-TCA impacted soil in the basement of a razed building and capping with crushed stone. Based on our discussion, the plan has been revised to the placement of the soil in the basement of the razed building as close to the surface as possible, leaving enough room for a cap to consist of a minimum of 8 inches of compacted traffic bond and a minimum of 4 inches of asphalt. A cap maintenance plan that outlines annual inspections and maintenance will be prepared as a continuing obligation.

Please feel free to call if you have any questions regarding this submittal.

Sincerely,

Konicek Environmental Consulting, LLC

Gregory A. Konicek P.G., CHMM
