Purple Loosestrife Biocontrol Workshop

[Share](#) · Public Event

Time Sunday, April 10 · 9:00am - 12:00pm

Location Mosquito Hill Nature Center

Created By [Mosquito Hill Nature Center](#)

More Info

Purple loosestrife is native to Europe and Asia. After being introduced to North America, it managed to escape the specialized insects and diseases that keep it in check in its native lands. Free from these natural controls, purple loosestrife gained a competitive edge over our native wetland plants. Learn about this invasive plant in detail and how you can irradiate it using a well proven, natural method.

Cost :No charge
Registration due April 9.
