The construction of the Two Mile Pond created an opportunity for the local Leadership Class to design and install trees and shrubs around the pond. In addition, a communication subgroup of the leadership class will be writing articles for the local paper to explain the pond and tree planting project. The tree planting is planned for April 18th, 2013.

8. Summary of Project Challenges. (Space will expend to fit your text.) The project proceeded very well. The most challenging part of the project was providing a clay liner to reduce interaction of the pond water with the groundwater. Clay can not be found locally as most of the subsurface solls are sand. Clay becomes more prominent approximately 20 miles northwest of the City. We found a source that would exchange clay for sand. 7. Grantee Certification. Checking here Cortifies that, to the best of your knowledge, the information contained in this report is correct.
