

Citizen Resolution # 200123

Establish a 15" size limit for Walleye and Sauger on the Winnebago System including all of the Fox and Wolf Rivers up to the first impassable dam.

The daily bag limit for Walleye and Sauger was reduced from 5 daily to 3 daily a number of years ago. This did nothing to reduce angler exploitation of young of the year and yearling Walleye and Sauger. The Winnebago System experiences some very large annual spawning success. In years when this occurs many anglers are catching and keeping large numbers of small fish. There needs to be a regulation to protect these small Walleye and Sauger as they are protected in many other waters of the State.

Would you support the Conservation Congress working with the Wisconsin Department of Natural Resources and the state legislature to enact a 15" size limit of Walleye and Sauger on the entire Winnebago System?
