

Citizen Resolution # 370323

Panfish Limit on Shawano Lake

Shawano Lake receives very high fishing pressure throughout the year. It is located very close to a large metropolitan area in the Fox Valley and many fishing tournaments are hosted here. Coupled with the advancements in sonar, reducing the aggregate bag limit to 10 would be appropriate.

Shawano Lake can produce quality sized panfish when allowed to reach their growth potential. This would also allow panfish harvest to be more spread out over the year. This would align with a current fisheries toolbox regulation.

Do you agree to reduce the panfish aggregate bag limit to 10 for Shawano Lake?
