

# Citizen Resolution # 450123

## Designating the monarch butterfly as Wisconsin's State Butterfly

The population of the monarch butterfly has continued to decline in Wisconsin. I believe, if the monarch butterfly becomes our state butterfly, more citizens would take action to support raising monarchs, either at home, their businesses, schools, nature centers and at public parks.

**Would you support the Conservation Congress working with the state legislature to designate the monarch butterfly as the state butterfly?**

Additional Information provided by author:

On April 14th, 2014, the Outagamie County Conservation Congress attendees supported my "Saving the Monarchs" resolution with a 99 yes to 4 no vote. The State Board of the Conservation Congress also supported this resolution. Later that spring, a state legislative resolution was introduced to designate the monarch butterfly as our state butterfly. That resolution never made it to the floor of the legislature for a vote.
