

# Citizen Resolution # 560523

## Limit hunting and trapping in state parks to reduce risks in conflicting use

Allowing hunting and trapping in state parks raises concern for some users around their health and safety. Potential for accidents related to others who have placed traps or may be in the field with firearms present risks. An accident could be potentially lethal, which is difficult to ignore, and requires more vigilance than a carefree stroll through a beautiful woodland or meadow.

### Do you support restricting hunting and trapping within state parks to enhance the experience for other activities?
