

Region NER County Calumet Report Date 8/1970 Classification LA  
Water Body: Manitowoc River, North Branch  
Discharger: Potter WWTP

If stream is classified as Limited Forage Fish (LFF) or Limited Aquatic Life (LAL), check any of the following Use Attainability Analysis factors that are identified in the classification report:

- ☐ Naturally occurring pollutant concentrations prevent the attainment of use
- ☐ Natural, ephemeral, intermittent or low flow conditions or water levels prevent the attainment of the use, unless these conditions may be compensated for by the discharge of sufficient volume of effluent discharges without violating State water conservation requirements to enable uses to be met
- ☐ Human caused conditions or sources of pollution prevent the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place
- ☐ Dams, diversions or other types of hydrologic modifications preclude the attainment of the use, and it is not feasible to restore the water body to its original condition or operate such modification in a way that would result in the attainment of the use
- ☐ Physical conditions related to the natural features of the water body, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, preclude attainment of aquatic life protection uses
- ☐ Controls more stringent than those required by sections 301(b) and 306 of the Act would result in substantial and widespread economic and social impact

**Supporting Evidence in the report (include comments on how complete/thorough data is)**

- ☐ Biological Data (fish/invert)
- ☐ Chemical Data (temp, D.O., etc.)
- ☐ Physical Data (flow, depth, etc.)
- ☐ Habitat Description
- ☐ Site Description/Map
- ☒ Other: photographs

**Historical Reports in file:**

8/1970 - Dan Uhl / Dennis Weisense

**Additional Comments/How to improve report:**

- LA2 b/c of effluent ditch class'n.
- may need add'l info @ this site.
- need to make sure it IS indeed an effluent ditch.

POTTER SANITARY DISTRICT

POTTER, CALUMET COUNTY

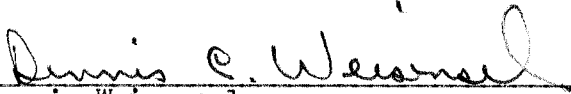

The Potter STP discharges to a man-made ditch which flows approximately 1500 feet to the North Branch of the Manitowoc River.

RECOMMENDATIONS

The ditch should be classified as an effluent ditch. The North Branch of the Manitowoc River should be classified as continuous/fish and aquatic life.
