

Congregation of St. Agnes Utilities - Fond du Lac County

Wastewater Receiving Stream Classification

Survey Date: 6-23-76

The Congregation of St. Agnes Utilities operates a package contact stabilization wastewater treatment plant followed by an effluent polishing pond. Effluent from the polishing pond flows through a tile and is discharged into a drainage ditch. The drainage ditch then flows into Taycheedah Creek. The Congregation of St. Agnes Utilities Wastewater Treatment Plant will be abandoned when service from the Fond du Lac Regional Plant becomes available.

Recommendations

The ditch that the Congregation of St. Agnes Utilities wastewater treatment plant discharges to shall be classified as non-continuous marginal use.
