Facility Name Kohler INCINERATOR

Receiving Water UNNAMED TRIBUTARY TO SHEBOYGAN RIVER

Evaluated by Dee Wenzel

This stream classification is not included in the revised code because (select one):

☒ The discharger is no longer at this location.

☐ A new classification has resulted in a full fish and aquatic life designation.
New survey date _____ Please provide copy of new classification report.

☐ This receiving water should be added to the database and to the code. Specify information, as it should be included in code.

☒ Other (please explain)

THIS FACILITY HAS BEEN ABANDONED AND NO
LONGER DISCHARGES TO THIS STREAM. REMOVE THIS
STREAM AS A VARIANCE STREAM.

Sheboygan Falls - Kohler Incinerator

Sheboygan County

Survey Date: 8-7-75

After treatment in a lagoon, wastewater from the incinerator flows in an effluent ditch for a distance of over 100 yards. The ditch also receives drainage from a small marsh to the north. The discharge contained high levels of ash and suspended solids. After flowing under the road to the landfill, the ditch ceases. For the remainder of the distance to the Sheboygan River, the flow follows contours. There was no evidence of stream banks or beds.

Recommendations

Effluent ditch for approximately 100 yards. Diffused surface water for remainder of distance to Sheboygan River. Non-continuous flow.
