

Aquatic Plant Management Notice

The Namakagon Lake Association is applying for permit from the Wisconsin Department of Natural Resources for a chemical treatment of Hybrid Northern/Eurasian Water Milfoil (HWM) in approximately 37 acres of Lake Namakagon. Proposed aquatic herbicides to be used include 2,4-D and ProcellaCOR both approved for use in Wisconsin. The treatment will occur in June 2024.

A copy of the draft permit is available by request by contacting harmonyenv@amerytel.net.

This notice is required by Chapter NR 107 Wisconsin Administrative Code.
