5. Additional Information. (Space will expand to fit your text.)

6. Summary of Project Challenges. (Space will expand to fit your text.)

Implementation of Stormwater Management Plan Capital Projects to achieve 40% TSS removal will not occur with current elected officials. Current elected officials feel these mandates have been passed down from the State with no thought of how they will be paid for. Stormwater Utility was implemented but not with large support. Current Utility rate is not set high enough to support Capital Projects and raising of rate to cover those costs will not happen in the foreseeable future.
