Subject: BRRTS #02-41-107191 Biogenesis Soil Question

Hi Steve,

I left you a voicemail message about the Biogenesis soil cap questions. It is appropriate to submit the soil cap information as a separate report for DNR review, as it should have been submitted for approval prior to importing soil to the site. We will need to approve that on the back end, so the report should provide details about where the soil was from, where was it placed and where were the samples collected.

Let me know if you have any questions about this.

Thank you,
Linda
