Jason and Ron,

The closure committee reviewed the 8/15/2018 Groundwater Monitoring Report for Rymenam's Property. The committee would like a water sample collected from the inactive potable well for the trailer home located on the western edge of the benzene plume. If that sample (analyzed via method 524.2) comes back with no detects, we can move forward with the closure request. Please prepare a change order request for the well sampling.

-Matt
