Yes, please proceed with the closure request packet.

Thanks.

We are committed to service excellence.

Matt, John Rush of Rush Well Drilling called to let me know he stopped by the site when he was in the area.

He was able to locate the well and break off the steel cap and noted that the well is completely filled in with concrete. He also stated that he looked around the site for any other well and could not locate any others except for our monitoring wells.

Based on this information, can we proceed with the closure request which has already been approved?

Thanks,

Jason Powell

Jason,

The approval letter is going out to the RP in the mail today. A copy is attached. The variance was approved for accessing and sampling the 1 – 2 wells on the adjacent property. Please let me know when you are scheduled to do the fieldwork and contact me if there is any issues that day (i.e. the wells were damaged beyond repair and will need abandonment).

The request for Well abandonment was not approved at this time. Abandonment costs for the existing monitoring wells will not be approved until after case closure is granted.

-Matt
