Subject: Case Closure Denial for Reedsburg Cleaners  
349 E. Main Street, Reedsburg, Wisconsin  
DNR BRRTS Activity # 03-57-002801 and 02-57-001682

Dear Mr. Butz:

On February 6, 2014, the Department of Natural Resource's South Central Regional Closure Committee reviewed your request for closure of the case described above. The Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of your closure request, the closure committee has denied closure because additional requirements must be met. The purpose of this letter is to inform you of the remaining requirements for obtaining closure, and to request your written response within 60 days of receiving this letter.

Additional site work is necessary at the above described site in order to meet the requirements for site closure. Your site was denied closure because additional remedial actions (whey injections) are needed to further reduce the mass of chlorinated compounds at the site, and because additional vapor investigation is needed. Additional groundwater monitoring will also be needed to evaluate the effectiveness of the additional whey injections.

**Need to Complete a Vapor Investigation**

Additional site investigation is needed to determine whether or not vapor intrusion is a completed pathway at this site, or if there is a risk of future exposure due to residual contamination. If vapor intrusion is an issue at this site, document all source control actions taken. Add the necessary site-specific information.

**Need to Conduct Additional Groundwater Monitoring**

Additional groundwater monitoring is needed in order to establish compliance with the closure criteria of ch. NR 726. If monitored natural attenuation is to be used as a remedial action, you need to determine whether there is a stable or receding plume. Add the necessary site-specific information.

**Need to Define the Degree and Extent of Contamination**

Additional soil, groundwater and/or vapor sampling is needed in order to define the degree and extent of contamination. Add the necessary site-specific information.

**Need to Conduct Additional Remedial Action**

Additional remedial action is needed in order to comply with the closure criteria of ch. NR 726. Add the necessary site-specific information.

(Include this paragraph in all letters with conditions)

Submit a complete closure request once all the above requirements have been satisfied, together with any required

documentation, to let me know that applicable requirements have been met. Case closure can be considered once all the above requirements have been satisfied.

**Please respond in writing, within 60 days of the date of this letter, with a schedule of your plans to meet these requirements. Until requirements have been met, your site will remain "open" and you will also need to continue to submit the semi-annual progress reports, as required by s. NR 724.13 (3), Wis. Adm. Code.**

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at [Staff phone number].

Sincerely,

[Staff name]
