Dear Victoria:

I am responding to your letter dated July 1. I spoke briefly to Eric Amadi about our situation and he suggested I put our conversation in writing to you.

We have not tested the monitoring wells at our site for several years. I believe the most recent test was in 2003 for which we sent you the results. I apologize for this, it just kind of fell off my radar screen.

In February of this year, we decided that we better do some testing of the monitoring wells. I contacted John Osborne at GZA Geo Environmental to do the testing, as they had done all the previous work on this site for us. He is ready to test, however we are waiting on a permit from Milwaukee County Parks Department to enter onto their property for testing. (A few of the test wells are on their property which immediately borders our property.)

I have been waiting since March for the permit to be issued. I have been in contact with Kevin Haley at the Parks Department every couple weeks to check up on the permit. As of yet, I have not gotten it, however he says it will be done in a week or so.

Once I get the permit, I will have GZA do the testing immediately and I will get the results to you along with the recommendations and plans from GZA on how we should proceed forward to eventual case closure.

If you have any questions, please contact me.

Sincerely,

Arvid Huth
