Groundwater Quality/NR 700 Semiannual Progress Report

Dear John:

On behalf of Villard Foodtown, O M Enterprises, Inc. (OM) is submitting "Groundwater Quality/NR 700 Semiannual Progress Report" for the referenced site. The groundwater samples of seven monitoring wells, PZ-1, and PZ-2 were collected on February 11, 2017. Based on the groundwater quality data, O M believes that plume is stable and additional groundwater monitoring is not warranted.

Three monitoring wells are required to determine the flow of groundwater. Based on the groundwater elevation data of four monitoring wells (MW-1 through MW-4), installed between September 1991 and March 1993, the flow of groundwater was determined predominantly to the east. Therefore, we believe that an additional site survey of three groundwater monitoring wells (MW-5 through MW-7) and two piezometers (PZ-1 and PZ-2), installed in May 2016 is not warranted.

Site Location and Current Use

The property is bounded by West Villard Avenue to the north. A rail road borders the property to the east, northeast, and southeast. God's Anointed Ones Church is located to the west. Commercial properties are located to the west and southwest. The area of the property is approximately 56,296 square feet. Based on the city records, approximately 17,433 square feet gross area (16,400 square feet in use as supermarket/grocery store and 1,043 square feet in use as fast food without seating) is occupied by one-story brick building.

Previous Property Uses

1910	Lumber Company
1963	Construction of Existing Building For Food Store
1962-1976	Approximately 1,000 Sq. ft of Building (NE) Used as Coin Operated Laundry
1976	Dry Cleaning Operation Using perchloroethylene (tetrachloroethene)
1978	One Hour Fabricare Cleaners
	Concrete Sump Installed for Storing Spillage from Cleaning Machines
	Dry Cleaning Operation in a Type IV Non-transfer Permac Dry Cleaning Unit
	Dike Constructed Around Unit for Transfer of Used Solvent to Concrete Sump
1984	Discontinuation of Dry Cleaning Operation

Engineering Survey

Based on the survey of four monitoring wells, the groundwater appears to flow to southeast. O M believes that an engineering survey is not warranted.

Vapor Intrusion Pathway and Abandoned Concrete Sump

The concrete sump was abandoned in place in 1984. The size, location, and method of the abandonment of the concrete sump are unknown. The contamination has migrated out of the building. Also, there is no report of vapor intrusion inside the building. Therefore, O M believes that testing of sub-slab soil sample and indoor air quality testing are not warranted.

Summary, Conclusions, and Recommendations

The site was used as a dry cleaning facility from 1976 to 1984. The concentration of contaminants appears to be stable.

The concrete sump was abandoned in place in 1984. The contamination has migrated out of the building. There is no report of vapor intrusion inside the building.

Therefore, O M believes that groundwater sampling, an engineering survey, testing of sub-slab soil sample, and indoor air quality testing are not warranted.

Thank you for your cooperation

Sincerely,
