**Subject:** Decorah Shopping Center - closure comments

Binyoti -

Here's a summary of the closure committee's recommendations for the Decorah Shopping Center closure request. A finalized copy of meeting minutes will follow.

Regarding a closure request for the Decorah Shopping Center dry cleaner site the additional information will be required prior to reconsideration of site closure:

1. Consultant/RP needs to respond to previous request by Department to identify the source of PCE contamination. Binyoti should reiterate his earlier request.
2. RP/consultant needs to provide a more detailed assessment of utilities and their potential as a migration pathway, (including depth to and slope)
3. Additional groundwater monitoring of monitor wells MW-5 and MW-7 should continue until they can demonstrate stable or decreasing contaminant trends.
4. Class I public notice required for soil performance standard (asphalt cover) **and natural attenuation????** as the proposed remedy.

**Note:** Closure will ultimately require a deed restriction requiring maintenance of the asphalt cover and building as well as groundwater use restrictions.
