KEY ENGINEERING GROUP, LTD.  
File No. 0702007

Dear Mr. Amungwafor:

The purpose of this letter is to provide the Wisconsin Department of Natural Resources (WDNR) with a project status update for the above referenced site. This letter was prepared by Key Engineering Group, Ltd. (KEY) on behalf of Continental VI Fund Limited Partnership (Continental).

#### **ADDITIONAL SITE INVESTIGATION RESULTS**

The following activities have been conducted pursuant to KEY's October 30, 2001 *Project Status Update*:

- October 31, 2001: Four groundwater monitoring wells (MW-12 through MW-15) were installed in Lincoln Drive West and Terrace Drive. One soil sample collected during the installation of each monitoring well (3.5 to 5.5 feet below ground surface) was submitted for analysis of volatile organic compounds (VOCs).
- November 5, 2001: The newly installed and nine existing monitoring wells were sampled; the groundwater samples were submitted for analysis of VOCs. Select natural attenuation indicator parameters, including temperature, dissolved oxygen, pH and oxidation-reduction potential were field measured.
- January 22, 2002: Two monitoring wells (MW-4 and MW-7) installed in connection with the Matanaer Service Station property (905 South Main Street; FID #267093970) were surveyed relative to the subject site monitoring well network. Groundwater elevations were determined for these monitoring wells and the subject site monitoring wells.

The monitoring well locations are depicted on Figure 1. The soil boring logs and monitoring well construction and development forms are included in Attachment 1. The additional site investigation procedures were conducted in general accordance with KEY's February 3, 1998 *Site Investigation Work Plan*.

The soil sample analytical results are summarized in Table 1 and the laboratory report is included in Attachment 2. The soil sample analytical results indicated that no VOCs were detected.

Mr. Binyoti F. Amungwafor  
April 11, 2002  
Page 2

The groundwater sample analytical results are summarized in Table 2 and on Figure 2 and the laboratory report is included in Attachment 3. The natural attenuation indicator parameter results are summarized in Table 3. The groundwater sample analytical results indicated that detected tetrachloroethene (PCE) concentrations were generally consistent with those previously detected at several previously sampled monitoring well locations. PCE was detected at concentrations of 1,000 micrograms per liter ( $\mu\text{g/l}$ ) and 77  $\mu\text{g/l}$  at the two northernmost new monitoring wells (MW-13 and MW-14, respectively). These PCE concentrations are generally one to two orders of magnitude higher than the concentrations previously detected closer to the subject site. PCE was not detected at the two southernmost new monitoring wells (MW-12 and MW-15).

Groundwater elevation data is summarized in Table 4 and a groundwater elevation contour map (January 22, 2002 measurements) is included as Figure 3. The groundwater elevation data indicates a groundwater flow direction consistent with previous data (northeasterly to easterly).

### **SITE VICINITY RESEARCH**

Based on the groundwater flow direction and the relatively high PCE concentrations detected at MW-13 and MW-14, the most significant groundwater impacts are not located directly down gradient of the suspected PCE source area (area of unsaturated soil impacts near the back door of the on-site dry cleaner). Based on this groundwater contamination distribution, KEY reviewed City and WDNR records for properties in the vicinity of the site to evaluate whether any of the properties could be a contributing source of chlorinated volatile organic compound (CVOC) groundwater impacts detected in Lincoln Drive West and Terrace Drive. The properties researched and occupancy summary, based on City records, are documented in the following table. The locations of these properties are depicted on Figure 1.

Property	Occupancy Summary
Auto Zone (Former McDonald's) 915 South Main Street	Auto Zone since 1999. McDonalds from approximately 1999 to 1972 (year of development).
Matanaer's Service Station 905 South Main Street	Service station since at least 1955.
Lifetime Exhaust 885 South Main Street	Muffler shop owned by Mr. David Mossman since approximately 1982. Standard service station from approximately 1982 to 1955 (apparent year of development).
Flowers on Main 930 South Main Street	Flower shop/greenhouse since at least 1970 (also apparently occupied by Schober's Camera in the late 1960s and early 1970s).
Shear Excitement Hair Salon 914 South Main Street	Hair salon and/or massage parlor since at least 1967. Possibly a residence or "retail store" from approximately 1967 to 1957 (apparent year of development).
Ol' Tyme Cleaners 910 South Main Street	Dry cleaner and/or "coin operated laundry" since approximately 1961 (year of development).
Dominos Pizza 906 South Main Street	Dominos Pizza since 2001. Various restaurants (Sir Donut, Emley's Drive In, Chef Burger) since 1957 (year of development).
Schleif Service Station 884 South Main Street	Service station since 1957 (year of development).

The WDNR has case files for four of the above properties plus one case associated with work done near the intersection of South Main Street and Hawthorn Drive. The following table summarizes the principal findings of reviews of each of the WDNR case files.

Mr. Binyoti F. Amungwafor  
April 11, 2002  
Page 3

Case File	Pertinent Findings
Auto Zone (Former McDonald's) 915 South Main Street WDNR FID #: 267159200	<ul style="list-style-type: none"><li>The WDNR granted an "off-site exemption" to Auto Zone in April 1999 in connection with the detection of contaminants in groundwater during a 1996 Phase II Environmental Site Assessment (ESA). The Phase II ESA consisted of three soil probes (SP01, SP02 and SP03). Petroleum contaminants, as well as trichloroethene and PCE, were detected in groundwater at the soil probe located furthest from the subject site (SP03).</li><li>A groundwater flow map and CVOC isoconcentration map incorporating the Matanaer's and Schleif sites were included in this file. The maps were prepared based on 1996 data. The groundwater flow direction at the Matanaer's and Schleif sites was identified as northeasterly and northwesterly, respectively. Significant CVOC concentrations were detected in groundwater on both sites.</li></ul>
Matanaer's Service Station 905 South Main Street WDNR FID #: 267093970	<ul style="list-style-type: none"><li>Open leaking underground storage tank (LUST) case file.</li><li>No significant work has apparently been conducted at the site since approximately 1996.</li><li>CVOCs historically detected in groundwater (the July 1996 groundwater data which was summarized in the Former McDonald's case file was not included in this case file).</li></ul>
Lifetime Exhaust 885 South Main Street WDNR FID #: 267167120	<ul style="list-style-type: none"><li>Open LUST case file (the WDNR was notified of contamination on the site in April 1998).</li><li>A <i>Site Investigation Work Plan</i> was submitted in November 1998; no site investigation results were included in the file.</li></ul>
Schleif Service Station 884 South Main Street WDNR FID #: 267096310	<ul style="list-style-type: none"><li>Open LUST case file.</li><li>No significant work has apparently been conducted at the site since approximately 1996.</li><li>CVOCs historically detected in groundwater (the October 1996 groundwater data which was summarized in the Former McDonald's case file was not included in this case file).</li></ul>
Main Street Reconstruction Intersection of South Main and Hawthorne Drive WDNR FID #: 267169650	<ul style="list-style-type: none"><li>Soil petroleum contamination was encountered in south Main Street during a 1998 Phase II ESA.</li><li>CVOCs were not detected in soil samples collected during the Phase II ESA (the Phase II ESA did not include the collection of groundwater samples).</li></ul>

The research findings indicate that significant CVOC groundwater impacts have been detected north and northwest of the subject site (generally side gradient to up gradient of the subject site). Based on the data available, the most probable potential contributing sources of these impacts include Matanaer's Service Station, Schleif Service Station and Ol' Tyme Cleaners. The groundwater data collected closest to the subject site and most up gradient of MW-13 consists of the data collected on the Auto Zone property (adjacent to the north side of the subject site) in 1996. Documentation of this data is included in Attachment 4. The fact that CVOCs were only detected on the extreme northern portion of the Auto Zone property (adjacent to Matanaer's Service Station) suggests that the Auto Zone property, as well as other up gradient properties, have not contributed to the impacts at MW-13. The apparent lack of a contaminant source directly up gradient of MW-13 suggests one of the following scenarios:

- An 8-inch diameter clay sanitary sewer line located east of the subject site building, extending from south of the subject site to Hawthorn Drive, has served as a contaminant migration pathway from the subject site source area.
- CVOCs detected at MW-13 and MW-14 northeast of the subject site (in Lincoln Drive West and Terrace Drive) are representative of an off-site CVOC plume possibly associated with the CVOC contamination known to exist in the vicinity of the intersection of South Main Street and Hawthorn Drive (no significant investigation is known to have been conducted east of Matanaer Service Station).

### **Projected Additional Site Investigation**

Continental intends to conduct additional investigation to further evaluate the source of the relatively high concentrations of PCE in groundwater northeast of the site. The proposed scope of work includes advancing approximately seven soil probes adjacent to and

Mr. Binyoti F. Amungwafor  
April 11, 2002  
Page 4

east of the sanitary sewer on the subject site (two soil probes) and on the Auto Zone/Former McDonald's property (five soil probes). The soil probes would be spaced approximately 50 feet apart extending north from the on-site monitoring well/piezometer nest MW-4/P-1. One soil sample collected from each soil probe location will be analyzed for VOCs. The collection of groundwater samples from each soil probe will be attempted using temporary monitoring wells; collected groundwater samples will be analyzed for VOCs. The proposed soil probe/temporary well locations are depicted on Figure 3.

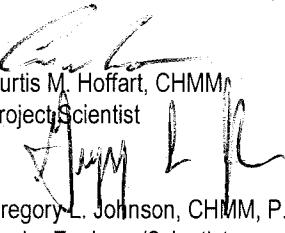

Continental contacted the owner of the Auto Zone property, Mr. Bill Tsiampos of Tsiampos, LLC, to inquire about obtaining sampling access. Mr. Tsiampos refused to provide access, indicating that he does not want to associate himself with another environmental issue considering that he recently made efforts to obtain the off-site liability exemption (a copy of the WDNR's April 30, 1999 liability exemption letter is included in Attachment 4). According to Mr. Tsiampos, Auto Zone, Inc. would also need to approve of any sampling on the property.

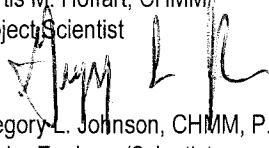

The exemption conditions documented in the WDNR's liability exemption approval letter for the Auto Zone property indicate that access must be provided to the WDNR or other "authorized party" to respond to the "release"; therefore, KEY and Continental request WDNR assistance in obtaining access from Tsiampos, LLC and Auto Zone, Inc. to conduct the proposed investigation. Mr. Bill Tsiampos can be reached at (262) 335-0777.

Please contact KEY if you have any questions regarding the proposed scope of work and requested assistance in obtaining sampling access. The scope of work will be conducted following WDNR approval and after access to the Auto Zone property is received. Your continued assistance with this matter is appreciated.

Sincerely,

KEY ENGINEERING GROUP, LTD.

Mr. Lawrence Evans  
Auto Zone, Inc.  
60 Madison Avenue  
Memphis, TN 38154

**SUBJECT:** Liability exemption for groundwater contaminated by an off-site source at 915 South Main Street, West Bend, WI

Dear Mr. Evans:

### Purpose

The Department of Natural Resources ("the Department") has recently reviewed your request for an off-site exemption letter for the property located at 915 South Main Street, West Bend, WI, which will be referred to in this letter as "the Property." You have requested that the Department determine whether Auto Zone, Inc., lessee, is exempt from sec. 292.11(3), (4) and (7)(b) and (c), Wis. Stats. (commonly known as the "Hazardous Substance Spill Law"), with respect to the existence of a hazardous substance in groundwater that you believe is migrating onto the Property from an off-site source.

### Determination

As you are aware, s. 292.13(2), Wis. Stats., requires the Department to issue upon request, a written determination regarding a liability exemption for a person who possesses or controls property that is contaminated by an off-site source, when certain conditions are met. Specifically, the Department has reviewed the *Phase I Environmental Site Assessment, McDonald's Property, 915 S. Main Street, West Bend, WI* dated October 4, 1996, the February 28, 1997 Off-site Determination Letter from Michael Thoompson, Wisconsin Department of Natural Resources (WDNR) to Ms. Loretta Mierow, McDonald's Corporation and the Non-culpability letter dated March 18, 1997 from Gina Keenan, WDNR to Mr. Bill Tsiampas, Omicron in order to make this determination. Based upon this information, and in accordance with section 292.13(2), Wis. Stats., the Department makes the following determinations regarding the presence of benzene, toluene, tetrachloroethene, and trichloroethene detected in groundwater at sampling points SPO1, SPO2 and SPO3 located on the Property (see attached map):

1. The hazardous substance discharge originated from a source on property that is not possessed or controlled by Auto Zone, Inc.
2. Auto Zone, Inc. did not possess or control the hazardous substance on the property on which the discharge originated.
3. Auto Zone, Inc. did not cause the discharge.

4. Auto Zone, Inc. will not have liability under the Hazardous Substance Spill Law for investigation or remediation of the groundwater contamination originating from off-site onto the Property, provided that Auto Zone, Inc. does not take possession or control of the hazardous substance of the property on which the discharge originated.

**Exemption Conditions**

The Department's determination, as set forth in this letter, are subject to the following conditions being complied with, as specified in s. 292.13(1) and (1m), Wis. Stats:

1. The facts upon which the Department based its determination are accurate and do not change.
2. Auto Zone, Inc. agrees to allow the following parties to enter the property to take action to respond to the discharge: the Department and its authorized representatives; any party that possessed or controlled the hazardous substance or caused the discharge; and any consultant or contractor of such a party.
3. Auto Zone, Inc. agrees to avoid any interference with action undertaken to respond to the discharge and to avoid actions that worsen the discharge.
4. Auto Zone, Inc. agrees to any other condition that the Department determines is reasonable and necessary to ensure that the Department and any other authorized party can adequately respond to the discharge.

The Department may revoke the determinations made in this letter if it determines that any of the requirements under sections 292.13(1) or (1m), Wis. Stats., cease to be met.

Future property owners are eligible for the exemption under section 292.13, Wis. Stats., if they meet the requirements listed in that statute section. The determinations in this letter regarding a liability exemption, however, only apply to Auto Zone, Inc., and may not be transferred or assigned to other parties. The Department will provide a written determination to future owners of this property, if such a determination is requested in accordance with the requirements of section 292.13(2), Wis. Stats.

If you have any questions or concerns regarding this letter, please contact me at (414) 229-0874 or Attorney Judy Ohm at (608) 266-9972.

Sincerely,

Nancy D. Ryan  
Hydrogeologist

## Off-Site Discharge Exemption Request Application

Form 4400-201 (8/98)  
Page 1 of 3

Notice: Persons requesting an off-site discharge exemption letter ("off-site letter") from the Remediation and Redevelopment Program, as provided in s. 292.13, Wis. Stats., must provide the information requested on this application. Personally identifiable information collected may be used for purposes other than that for which it was originally collected. Under Wisconsin's open records laws, DNR is required to provide all non-confidential information to any person who requests it. Such information may be provided to the public in written or electronic form.

Instructions:

Throughout this application, "Property" refers to a property which has been impacted by hazardous substances that migrated from an off-site source.

1. Fill out separate forms if more than one person is requesting an off-site letter for the Property
2. Attach a check made payable to the DNR to this application form to cover Department review costs. To obtain current information on fees, call (300) 367-6076 for in-state long distance or (608) 264-6020 for out-of-state or local calls.
3. Return completed form to the DNR Regional office where the Property is located. The locations of Regional offices are listed at the end of this form.

### Applicant Information - Person Requesting Off-Site Letter

Applicant Name - Last: <b>Stephens</b>	First: <b>Mike</b>	MI	Telephone Number: <b>(901) 495-8790</b>
Company: <b>Auto Zone</b>	Title: <b>Real Estate Manager</b>		
Mailing Address: <b>60 Madison Avenue</b>		Fax Number: <b>(901) 495-8900</b>	
City: <b>Memphis</b>	State: <b>TN</b>	Zip Code: <b>53254</b>	
Do you: <input type="checkbox"/> own or <input checked="" type="checkbox"/> lease the Property?	Do you intend to: <input type="checkbox"/> acquire or <input checked="" type="checkbox"/> lease the Property		
Environmental Consultant Name - Last: <b>Cooper</b>	First: <b>Kevin</b>	MI	Telephone Number: <b>(414) 338-9697</b>
Company: <b>Cooper Environmental &amp; Resources, Inc.</b>	Title: <b>President</b>		
Mailing Address: <b>1411 North Main Street</b>		Fax Number: <b>(414) 338-9645</b>	
City: <b>West Bend</b>	State: <b>WI</b>	Zip Code: <b>53090</b>	
Attorney Name - Last: <b>Kotsonis</b>	First: <b>George</b>	MI	Telephone Number: <b>(414) 271-7474</b>
Firm: <b>Kotsonis Attorney</b>	Title: <b>Attorney for Leasor</b>		
Mailing Address: <b>Century Building 230 W. Wells Suite 610</b>		Fax Number: <b>NA</b>	
City: <b>Milwaukee</b>	State: <b>WI</b>	Zip Code: <b>53203</b>	

If you intend to acquire or lease this Property, provide the following information about the current owner of the Property.

Property Owner Name - Last: <b>Tsiampas</b>	First: <b>Bill</b>	MI	Telephone Number: <b>(414) 335-0777</b>
Mailing Address: <b>1505 South Main Street</b>		NA	Fax Number: <b>NA</b>
City: <b>West Bend</b>	State: <b>WI</b>	Zip Code: <b>53095</b>

## Off-Site Discharge Exemption Request Application

Form 4400-201 (8/98) Page 2 of 3

### **Property Information - Property Impacted By Off-Site Discharge**

Has a discharge to soil or groundwater been detected on the Property described?

Yes     No

If contamination has been detected, has it been reported to the State?     Yes     No    If yes, check all that apply:     DNR    Date Reported \_\_\_\_\_

Division of Emergency Government    10/04/96

Is the source of the contamination known?     Yes     No     Not Confirmed    If yes, what is the source?    Upgradient Dry Cleaner Establishments

If yes, provide name of the property owner and address of the property where contamination is known or from which it is suspected to be migrating:

Source Property Owner Name - Last	First	MI	Telephone Number
Mr. Bob's Drycleaning (Potential Source)			(414) 338-0735
Location Address of Contamination Source		Fax Number	
1025 South Main Street		NA	
City	State	Zip Code	
West Bend	WI	53095	

### **Property Information Needed to Process Application**

Provide the following information to process your application:

Please refer to the following documents:

Include the following information for each submittal:

1. Map(s) showing Property location, and any suspected or known off-site source properties.
2. For any environmental data submitted, include:
  - a) Property map(s) showing sampling locations for all data submitted.
  - b) Interpretation of data signed by a qualified environmental professional.
  - c) Soil boring logs,
  - d) Groundwater monitor well construction, development and sampling logs,
  - e) Laboratory-provided data reports,
  - f) Survey information for groundwater elevations,
  - g) Chain of custody forms for all samples, and
  - h) Description of sample collection methods.

- Phase I Environmental Site Assessment Report (10/04/96)
- Correspondence to WDNR (02/18/97)
- Correspondence from WDNR (02/28/97)
- Correspondence from WDNR (03/18/97)
- Property Lease (08/17/98)

Document that the statutory criteria listed in A through C below are satisfied. Examples of information that may be used to document that the criteria are satisfied are provided.

- A. Document that there is hazardous substance contamination present in soil or groundwater on the Property. Examples of information include:

Analytical results and interpretations for samples collected from soil and/or groundwater on the Property, or at or near the Property line, that conclusively document the presence of a hazardous substance in either or both of these media on the Property. This information could be documented in a Phase II Environmental Assessment report.

- B. Document that the hazardous substance contamination present in soil or groundwater on the Property is migrating onto the Property from an off-site source. Examples of information include:

1. Information identifying known or suspected discharges of the hazardous substance on neighboring property(ies) (e.g., a Phase I Environmental Assessment report).
2. Soil and/or groundwater sample data and interpretations adequate to conclude that the hazardous substance is migrating onto the Property, such as:
  - Samples from monitoring wells located on the up-gradient side of the Property (include information to establish up-gradient direction), which show increasing contaminant concentrations toward the up-gradient Property boundary; or
  - off-site investigation results which provide information about groundwater flow direction and contaminant movement that convincingly document that hazardous substances from a known or suspected off-site source have impacted the Property.

- C. Document that the discharge of a hazardous substance is not from a source on the Property. Examples of information include:

1. Information related to historical activities, such as descriptions of chemicals used and handled, areas where chemicals were used and handled, and areas of potential discharges on the Property (e.g., a Phase I Environmental Assessment report).
2. Where the types of hazardous substances used, handled, or discharged on the Property are the same as the hazardous substances migrating on to the Property, provide environmental information (e.g., expanded Phase II environmental assessment data), including analytical results and interpretation for soil and groundwater samples collected from potential discharge areas.
