FROM: John Feeny

SUBJECT: Annual report required in Binyoti's review letter from December 2012

I called Dawn Gabardi at Arcadis Dawn Gabardi at Arcadis. She said the sampling work was not completed until this past July, so the report won't be submitted until the end of this year.

I also asked her if they would have enough money in the budget for the closure report. She said yes, "that is built in". She also said that they have money for well abandonment. She said she is worried about doing some vapor intrusion issues - (could be a change order request coming for that).

She asked me if she could abandon the wells near the dry cleaner that have been clean for several rounds. They are degraded to the point that they would need to be replaced. I told her to go ahead and abandon those well.
