Good Morning Greg-

As a follow-up to my conversation with Greg Moll this morning, we wanted to advise you that Marquette University has elected to temporarily postpone implementation of the PFAS groundwater sampling plan described in the below e-mail. Ramboll staff will be on site today conducting the routine semi-annual groundwater sampling. The tentative plan is to include the PFAS sampling as part of the subsequent routine semi-annual sampling event planned for October 2022. We will advise you of any changes to that approach, if needed.

Please let us know if you have any questions or concerns.

Kind regards

Susan Petrofske

Subject: PFAS Groundwater Sampling Plan, BRRTS #: 02-41-152248

Mr. Smullen,

On February 24, 2022, the Wisconsin Department of Natural Resources (DNR) received a PFAS groundwater sampling plan for the Taxman Investment Co. (FMR), 1214 W. Wells St., Milwaukee, WI,

submitted on your behalf by Ramboll US Consulting, Inc. The plan was submitted in response to the DNR's request for PFAS groundwater sampling on February 11, 2022 due to historic dry-cleaning services at the site. The DNR has reviewed and approves the PFAS groundwater sampling plan.

The groundwater sampling plan included the following items:

- Collect a groundwater sample from piezometer well PZ-1R and submit to Pace Analytical for laboratory analysis of PFAS (WI 33 compound). One duplicate sample, field blank, and trip blank will also be included for quality assurance and quality control (QA/QC) purposes.
- Collect a groundwater sample from upgradient monitoring well MW-2 for possible PFAS analysis. The laboratory will be instructed to extract and hold the MW-2 sample pending receipt and review of the PZ-1R and QA/QC sample results.
- Provide a WAC NR 716.14 data transmittal with the PFAS sampling results to the WDNR within 10-business days of receipt of the final laboratory analytical report.
- Formally present the PFAS groundwater sampling results in the routine semi-annual progress report that will be prepared following the April 2022 sampling event.

If you have any questions or require additional information, please contact me at (262) 202-3921.

Greg
