Hi Greg and Binyoti,

Ramboll US Consulting, Inc. (Ramboll), on behalf of Marquette University (Marquette), is providing the Wisconsin Department of Natural Resources (WDNR) with this notification of a planned supplemental carbon amendment injection event scheduled to take place on July 6, 2022 at the Former Taxman Site/One Hour Valet site (BRRTS# 02-41-152248) in Milwaukee. The injection work is being conducted in accordance with the Infiltration Temporary Exemption approval extension issued by the WDNR on June 9, 2022. It is estimated that a combined total of 300 gallons of carbon amendment solution (55 gallons of ABC® formula diluted with approximate 245 gallons of water) will be introduced into the previously constructed injection wells (IW-1 through IW-8). The injection activities will be documented in the semi-annual groundwater monitoring report prepared following completion of the October 2022 groundwater sampling event.

Please let us know if you have any questions or require any additional information at this time. We appreciate both of your assistance on this project.

Kind regards

Susan Petrofske
