Subject: Review of Waste Determination  
Praefke Brake & Supply  
133 Oak Street  
West Bend, WI.

Dear Ms. Drury Buzecky:

The Wisconsin Department of Natural Resources (Department) has reviewed the "Application for Reconsideration of Hazardous Waste Determination" submitted by you on October 23, 2003. The Department concurs with your conclusion that the soils on site be considered a solid waste. However, the soils on site may still be considered hazardous waste if the soils exceed TCLP levels. Complete the required Characteristic Hazardous Waste Determination before disposing of any soils from the site. Please find enclosed a signed Hazardous Waste Determination for the above facility.

Provide a minimum two-week notice to the Department prior to implementing soil removal activities. A Department representative may visit the site during soil removal. In addition, provide a summary report of the soil removal to the Department within 60 days after completion as required in NR 724.15.

The WDNR reserves the right to require additional work, both on and off of the facility property, if the site investigation and remediation proves insufficient. If you have any questions regarding this letter, please contact me at 262-574-2146.

Sincerely,

Mark Drews, P.G., CHMM  
Hydrogeologist  
Bureau for Remediation & Redevelopment
