Milwaukee, WI 53224

Subject: Conditional Approval of Site Investigation Work Plan, former Key Products, 8627-8633
West Lynx Avenue, Milwaukee WI 53225

Dear Mr. Meinburg:

The Wisconsin Department of Natural Resources (WDNR) acknowledges the receipt of your scope of work plan entitled *Site Investigation Work Plan, Former Key Products, Milwaukee, WI May 23, 2000*, dated May 23, 2000 and received by the WDNR on May 23, 2000. The report was prepared and submitted on your behalf by Key Engineering Group, LTD..

The WDNR conditionally approves the site investigation work plan pending the inclusion of the following:

- The purpose of the site investigation is to definitively define the groundwater flow direction at the site.
- That monitoring well MW-1 will not be used to define the groundwater flow direction because of the bathtub effect caused by the back fill of the excavation.

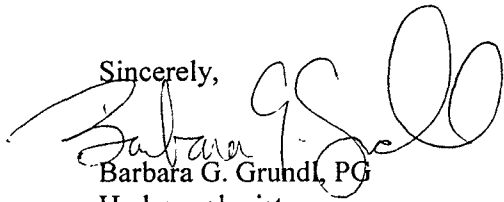

The WDNR reserves the right to require additional work if the site investigation proves insufficient to:

- Define the degree, extent and character of the contamination in the soils and groundwater at the site.
- Define the groundwater flow direction.

All work performed must be reviewed and approved by the WDNR prior to implementing any work. In addition prior the performing field work (i.e. drilling, soil sampling, groundwater sampling, etc.) you must give notice to the WDNR three working days prior to implementing of the fieldwork. You will be given 90 days from the receipt of this letter to provide a report detailing the site investigation data collected in accordance with Wis. Adm. Code NR 716.

Thank-you for your continued cooperation. Should you have any questions, please feel free to call me at (414) 229-0870.

Sincerely,

A handwritten signature in black ink, appearing to read 'Barbara G. Grundl', with a large, stylized flourish at the end.

Barbara G. Grundl, PG
Hydrogeologist
