

CERTIFIED MAIL/RETURN RECEIPT REQUESTED

January 10, 2023

RUTH ANN OLSON
W5030 ERICKA'S WAY
MEDFORD, WI 54451

Subject: **Status Update Request**
Perry's Corner, N6097 State Highway 73, Hannibal, Wisconsin
DNR BRRTS Activity #03-61-168823

Dear Ms. Olson:

On September 9, 1997, the Wisconsin Department of Natural Resources (DNR) notified you of your legal responsibilities under Wisconsin Statute (Wis. Stat.) § 292.11 to investigate the degree and extent of the hazardous substance discharge on the above-referenced site. The DNR has not received information concerning your efforts to respond to this hazardous substance discharge since private well sampling results were submitted on June 6, 2021. The DNR requests that the following information be submitted **by February 15, 2023**:

- 1.) A written status update including plans to conduct additional groundwater monitoring.

As the responsible party for this hazardous substance discharge, you have the legal responsibility under Wis. Stat. § 292.11 to investigate and clean up contamination resulting from the hazardous substance discharge. The DNR will work with you to move this site towards closure.

Your legal responsibilities are defined in statute and in administrative code. The hazardous substances spill law, Wis. Stat. § 292.11(3), states "A person who possesses or controls a hazardous substance which is discharged or who causes the discharge of a hazardous substance shall take the actions necessary to restore the environment to the extent practicable and minimize the harmful effects from the discharge to the air, lands, or waters of the state."

Wisconsin Administrative Code (Wis. Admin. Code) chs. NR 700 to NR 799 establish requirements for emergency and interim actions, public information, site investigations, design and operation of remedial action systems, and case closure.

The DNR appreciates your cooperation and looks forward to an update regarding this site. If you have any questions regarding the site or this letter, please contact me at (715) 360-1966 or via email at Carrie.Stoltz@Wisconsin.gov

Sincerely,

Carrie Stoltz

SUBJECT: Perry's Corner, N6097 Hwy 73, Gilman, WI

Dear Ms. Olson:

On August 14, 1997, the Department of Natural Resources - Remediation and Redevelopment Program was notified by Ray deLong of Remedial Engineering, Inc that unleaded gasoline contamination was discovered during site assessment activities at the above referenced site.

Based on the information we have received, the Department believes that you are responsible for restoring the environment at this site under Section 292.11(3), Wisconsin Stats. known as the hazardous substances spills law. Your responsibilities include investigating the extent of the contamination, and then selecting and implementing the most appropriate remedial action. Enclosed is information to help you understand what you need to do to ensure your compliance with the spills law.

The purpose of this letter is threefold: 1) to describe your legal responsibilities, 2) to explain what you need to do to investigate and clean up the contamination, and 3) to provide you with information about cleanups, environmental consultants, and working cooperatively with the Department of Natural Resources.

Legal Responsibilities:

Your legal responsibilities are defined both in statute and in administrative rules. The hazardous substances spill law, Section 292.11(3) Wisconsin Statutes, states:

- * **RESPONSIBILITY.** A person who possesses or controls a hazardous substance which is discharged or who causes the discharge of a hazardous substance shall take the actions necessary to restore the environment to the extent practicable and minimize the harmful effects from the discharge to the air, lands, or waters of the state.

Wisconsin Administrative Codes NR 700 through NR 728 establish requirements for emergency and interim actions, public information, site investigations, design and operation of remedial action

stems, and case closure. Chapter NR 708 includes provisions for immediate actions in response to limited contamination. Wisconsin Administrative Code NR 140 establishes groundwater standards.

Steps to Take:

The longer contamination is left in the environment the farther it can spread and the more it may cost to clean up. Quick action may lessen damage to your property and to neighboring properties and reduce your costs in investigating and cleaning up the contamination. To ensure that your cleanup complies with Wisconsin's laws and rules, you should hire a professional environmental consultant who understands what needs to be done. The following are the first four steps to take:

1. Within thirty (30) days, please submit written verification (such as a letter from the consultant) that you have hired an environmental consultant. You will need to work quickly to meet this timeline.
2. Within sixty (60) days, your consultant must submit a workplan and a schedule for conducting the investigation. The consultant must follow the Department's administrative rules and our technical guidance documents. Please include with your workplan a copy of any previous information that has been completed for your site (such as an underground tank removal report, or a preliminary soil excavation report).
3. Please keep us informed of what is being done at your site. You or your consultant must provide us with a brief report at least every 90 days, starting after your workplan is submitted. These quarterly reports should summarize the work completed since the last report. Quarterly reports need only include one or two pages of text, plus any relevant maps and tables. However, please note that should conditions at your site warrant, you may receive a letter requiring more frequent contacts with the Department. You will also receive one annual site status report form in February.
4. When the site investigation is complete, your consultant must submit a full report on the extent and degree of soil and groundwater contamination and a proposal for cleaning up the contamination.

Due to the number of contaminated sites and our staffing levels, we will be unable to respond to each report. To maintain your compliance with the spills law and chs. NR 700 through NR 728, do not delay the investigation and cleanup by waiting for DNR responses. We have provided detailed technical guidance to environmental consultants. Your consultant is expected to be familiar with our technical procedures and administrative codes and should be able to answer your questions on meeting Wisconsin's cleanup requirements.

Your correspondence and reports regarding this site should be sent to the Department at the following address: Janet Kazda, Wisconsin Department of Natural Resources, PO Box 818, Rhinelander, WI 54501. Unless otherwise requested, please send only one copy of all plans and reports.

Information for Site Owners:

Enclosed is a list of environmental consultants and some important tips on selecting a consultant. If you are eligible for Wisconsin's PECFA program (see end of letter) you will need to compare at least three consultants' proposals before hiring a consultant. Consultants and laboratories working in the PECFA program are required to carry errors and omissions insurance to help protect you against unsuitable work. Also enclosed are materials on controlling costs, understanding the cleanup process, and choosing a site cleanup method. This information has been prepared to help you understand your responsibilities and what your environmental consultant needs to do. Please read this information carefully.

If you are interested in obtaining the protection of limited liability under s. 292.15, Stats., please contact Mark Giesfeldt at (608) 267-7562 or Darsi Foss at (608) 267-6713, in the Department of Natural Resources' Madison office for more information. The liability exemption under s. 292.15 Stats., is available to persons who meet the definition of "purchaser" in s. 292.15(1)(c) and receive Department approval for the response actions taken at the property undergoing cleanup. The Department will determine eligibility for this program on a case-by-case basis, prior to the "purchaser" developing a scope of work for conducting a ch. NR 716 site investigation at the property.

Financial Information:

Reimbursement from the Petroleum Environmental Cleanup Fund (PECFA) is available for the costs of cleaning up contamination from eligible petroleum storage tanks. The fund is administered by the Department of Industry, Labor, and Human Relations (DILHR). Please contact DILHR at (608) 267-3753 for more information on eligibility and regulations for this program.

If you have any questions about this letter or your responsibilities, please call me at 715-365-8990.

Thank you for your cooperation.

Sincerely,

Janet Kazda
