Hi Lynn,

I just wanted to notify you that DNR has not received a form or check for a formal No Action Required request for this site. Based on your November 9th email below, I was supposed to get it last week.

Regards,

We are committed to service excellence.

Hi Lynn,

Thanks for providing the electronic version of the report! I did not have it previously. Just curious, did DATCP have the owner resubmit the correct tank registration forms? I looked at the storage tank database and it appears they are logged correctly in the database as closed USTs, not ASTs, so not going to worry about it. I will start working on this once I receive the form and check.

Thanks,

We are committed to service excellence.

Tauren,

I'm not certain if I sent you the electronic version of the report, so I will send it again. Muhammad Javeed, the property owner has asked that we submit the site for a formal No Action Required. I will be sending the form and check in Monday. You are correct the tanks were USTs. Please let me know if you have any questions or need any further information. Thank you Tauren.

Subject: Express Mart, 2626 Memorial Drive, Two Rivers - UST Site Assessment

Hi Lynn,

I have reviewed the Underground Storage Tank Site Assessment received November 29, 2017 for the above referenced site. It appears that the naphthalene and total trimethylbenzenes detected in this assessment is associated with the closed case on the property, Citgo Express, BRRTS # 03-36-174861. The deed restriction lists naphthalene, trimethylbenzenes and other PVOCs at high concentrations at the former soil sample location B1000 which corresponds to the assessment soil sample location SS-7. This document will be filed with the closed case.

The completed tank registration forms are for above ground storage tanks, but these were underground storage tanks, correct?

Can you provide an electronic version of the report?

Thanks,

We are committed to service excellence.
