Hi Dee: Most recently we have communicated and sent correspondence to Patricia Hennesey, but the last was in February. She also indicated that she did not have funds to do additional work related to the last sampling results and MSA was PECFA agent for her.

This is how the State funding approval PO dollars are accounted:

Total Amt of PO: \$11,908.60
Monitoring and Private well sampling, Geoprobe: \$5,837.26
System/Trailer: \$1649.24
Abandon wells: \$4,422.10

We completed the Geoprobe, monitoring well and private well sampling last June and invoiced \$5,479.69 for that portion of the PO and that work is complete. The last communications indicated additional sampling work may be needed and we did not proceed with well and system abandonment, so the System/Trailer/Abandonment approval dollars have not been spent and well abandonment has not occurred. Our thought was we don't want to abandon wells if they will be needed for future samples, and we have not proceeded with abandonment. Those PO dollars have not been spent and will not be invoiced by MSA (unless the work happens for those items), and we are not proceeding with them at this time.

Let me know if you have questions or comments, but that is the status of the PO funds.

Hi Dick,

Just wondering the status of this case, as there were funds allocated to it from the state and fiscal is wondering if they are going to be used? Thanks for your update.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
