** Site Specific Residual Contaminant Level

This Adobe Fillable form is intended to provide a list of information that is required for evaluation for case closure. It is to be used in conjunction with Form 4400-202, Case Closure Request. The closure of a case means that the Department has determined that no further response is required at that time based on the information that has been submitted to the Department.

NOTICE: Completion of this form is mandatory for applications for case closure pursuant to ch. 292, Wis. Stats. and ch. NR 726, Wis. Adm. Code, including cases closed under ch. NR 746 and ch. NR 726. The Department will not consider, or act upon your application, unless all applicable sections are completed on this form and the closure fee and any other applicable fees, required under ch. NR 749, Wis. Adm. Code, Table 1 are included. It is not the Department's intention to use any personally identifiable information from this form for any purpose other than reviewing closure requests and determining the need for additional response action. The Department may provide this information to requesters as required by Wisconsin's Open Records law [ss. 19.31 - 19.39, Wis. Stats.].

BRRTS #: 03-68-176464 PARCEL ID #: MNFV 0101030, 0101032, 0101033

ACTIVITY NAME: SUPER EXCAVATORS INC WTM COORDINATES: X: 675162 Y: 296489

CLOSURE DOCUMENTS (the Department adds these items to the final GIS packet for posting on the Registry)

- Closure Letter**
- Maintenance Plan** (if activity is closed with a land use limitation or condition (land use control) under s. 292.12, Wis. Stats.)
- Conditional Closure Letter**
- Certificate of Completion (COC)** for VPLE sites

SOURCE LEGAL DOCUMENTS

- Deed:** The most recent deed as well as legal descriptions, for the **Source Property** (where the contamination originated). Deeds for other, off-source (off-site) properties are located in the **Notification** section.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Certified Survey Map:** A copy of the certified survey map or the relevant section of the recorded plat map for those properties where the legal description in the most recent deed refers to a certified survey map or a recorded plat map. (lots on subdivided or platted property (e.g. lot 2 of xyz subdivision)).
Figure #: **Title: Survey No. 120755-S**
- Signed Statement:** A statement signed by the Responsible Party (RP), which states that he or she believes that the attached legal description accurately describes the correct contaminated property.

MAPS (meeting the visual aid requirements of s. NR 716.15(2)(h))

Maps must be no larger than 8.5 x 14 inches unless the map is submitted electronically.

- Location Map:** A map outlining all properties within the contaminated site boundaries on a U.S.G.S. topographic map or plat map in sufficient detail to permit easy location of all parcels. If groundwater standards are exceeded, include the location of all potable wells within 1200 feet of the site.
Note: Due to security reasons municipal wells are not identified on GIS Packet maps. However, the locations of these municipal wells must be identified on Case Closure Request maps.
Figure #: 1 Title: Vicinity Diagram
- Detailed Site Map:** A map that shows all relevant features (buildings, roads, individual property boundaries, contaminant sources, utility lines, monitoring wells and potable wells) within the contaminated area. This map is to show the location of all contaminated public streets, and highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding a ch. NR 140 Enforcement Standard (ES), and/or in relation to the boundaries of soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Levels (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: 2 Title: Site Features and Well and Trench Locations Diagram
- Soil Contamination Contour Map:** For sites closing with residual soil contamination, this map is to show the location of all contaminated soil and a single contour showing the horizontal extent of each area of contiguous residual soil contamination that exceeds a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL) as determined under s. NR 720.09, 720.11 and 720.19.
Figure #: 5 Title: Soil Analytical Results Above Direct Contact SSRCLs Diagram

BRRTS #: 03-68-176464

ACTIVITY NAME: SUPER EXCAVATORS INC

MAPS (continued)

- Geologic Cross-Section Map:** A map showing the source location and vertical extent of residual soil contamination exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL). If groundwater contamination exceeds a ch. NR 140 Enforcement Standard (ES) when closure is requested, show the source location and vertical extent, water table and piezometric elevations, and locations and elevations of geologic units, bedrock and confining units, if any.

Figure #: 4 Title: Geologic Cross Section

Figure #: 5 Title: Geologic Cross Section

- Groundwater Isoconcentration Map:** For sites closing with residual groundwater contamination, this map shows the horizontal extent of all groundwater contamination exceeding a ch. NR140 Preventive Action Limit (PAL) and an Enforcement Standard (ES). Indicate the direction and date of groundwater flow, based on the most recent sampling data.

Note: This is intended to show the total area of contaminated groundwater.

Figure #: 6 Title: Approximate Extent of Groundwater Impacts Above ESs Diagram

- Groundwater Flow Direction Map:** A map that represents groundwater movement at the site. If the flow direction varies by more than 20° over the history of the site, submit 2 groundwater flow maps showing the maximum variation in flow direction.

Figure #: 3 Title: Groundwater Elevation Contour Diagram

Figure #: 4 Title: Groundwater Elevation Contour Diagram

TABLES (meeting the requirements of s. NR 716.15(2)(h)(3))

Tables must be no larger than 8.5 x 14 inches unless the table is submitted electronically. Tables must not contain shading and/or cross-hatching. The use of **BOLD** or *ITALICS* is acceptable.

- Soil Analytical Table:** A table showing remaining soil contamination with analytical results and collection dates.
Note: This is one table of results for the contaminants of concern. Contaminants of concern are those that were found during the site investigation, that remain after remediation. It may be necessary to create a new table to meet this requirement.

Table #: 1 Title: VOC Analytical Results - Soil Samples

- Groundwater Analytical Table:** Table(s) that show the most recent analytical results and collection dates, for all monitoring wells and any potable wells for which samples have been collected.

Table #: 3 Title: Groundwater Analytical Results

- Water Level Elevations:** Table(s) that show the previous four (at minimum) water level elevation measurements/dates from all monitoring wells. If present, free product is to be noted on the table.

Table #: 2 Title: Groundwater Elevation

IMPROPERLY ABANDONED MONITORING WELLS

For each monitoring well not properly abandoned according to requirements of s. NR 141.25 include the following documents.

Note: If the site is being listed on the GIS Registry for only an improperly abandoned monitoring well you will only need to submit the documents in this section for the GIS Registry Packet.

- Not Applicable**

- Site Location Map:** A map showing all surveyed monitoring wells with specific identification of the monitoring wells which have not been properly abandoned.

Note: If the applicable monitoring wells are distinctly identified on the Detailed Site Map this Site Location Map is not needed.

Figure #: Title:

- Well Construction Report:** Form 4440-113A for the applicable monitoring wells.

- Deed:** The most recent deed as well as legal descriptions for each property where a monitoring well was not properly abandoned.

- Notification Letter:** Copy of the notification letter to the affected property owner(s).

BRRTS #: 03-68-176464

ACTIVITY NAME: SUPER EXCAVATORS INC

NOTIFICATIONS

Source Property

- Letter To Current Source Property Owner:** If the source property is owned by someone other than the person who is applying for case closure, include a copy of the letter notifying the current owner of the source property that case closure has been requested.
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying current source property owner.

Off-Source Property

Group the following information per individual property and label each group according to alphabetic listing on the "Impacted Off-Source Property" attachment.

- Letter To "Off-Source" Property Owners:** Copies of all letters sent by the Responsible Party (RP) to owners of properties with groundwater exceeding an Enforcement Standard (ES), and to owners of properties that will be affected by a land use control under s. 292.12, Wis. Stats.
Note: Letters sent to off-source properties regarding residual contamination must contain standard provisions in Appendix A of ch. NR 726.
Number of "Off-Source" Letters:
- Return Receipt/Signature Confirmation:** Written proof of date on which confirmation was received for notifying any off-source property owner.
- Deed of "Off-Source" Property:** The most recent deed(s) as well as legal descriptions, for all affected deeded **off-source property(ies)**. This does not apply to right-of-ways.
Note: If a property has been purchased with a land contract and the purchaser has not yet received a deed, a copy of the land contract which includes the legal description shall be submitted instead of the most recent deed. If the property has been inherited, written documentation of the property transfer should be submitted along with the most recent deed.
- Letter To "Governmental Unit/Right-Of-Way" Owners:** Copies of all letters sent by the Responsible Party (RP) to a city, village, municipality, state agency or any other entity responsible for maintenance of a public street, highway, or railroad right-of-way, within or partially within the contaminated area, for contamination exceeding a groundwater Enforcement Standard (ES) and/or soil exceeding a Residual Contaminant Level (RCL) or a Site Specific Residual Contaminant Level (SSRCL).
Number of "Governmental Unit/Right-Of-Way Owner" Letters:

June 18, 2009

Mr. Cliff Jacobson
Super Excavators, Inc.
N59 W14601 Bobolink Avenue
Menomonee Falls, WI 53051

SUBJECT: Final Case Closure with Continuing Obligations
Super Excavators, Inc., N59 W14601 Bobolink Avenue, Menomonee Falls, WI
WDNR BRRS Activity #: 03-68-176464 FID#268177910

Dear Mr. Jacobson:

The Wisconsin Department of Natural Resources (the Department) has received a request for closure of the above referenced case that was submitted on your behalf by Trenton Ott, Environmental & Development Solutions, Inc. (EDS). This Department reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases.

Based on the correspondence and data provided, it appears that your case meets the closure requirements in ch. NR 726, Wisconsin Administrative Code. The Department considers this case closed and no further investigation or remediation is required at this time, however, you and future property owners must comply with certain continuing obligations as explained in this letter.

GIS Registry

This site will be listed on the Remediation and Redevelopment Program's GIS Registry. The specific reasons are summarized below:

- Residual soil contamination exists that must be properly managed should it be excavated or removed
- Before the land use may be changed from industrial to non-industrial, additional environmental work must be completed
- Pavement, an engineered cover or a soil barrier must be maintained over contaminated soil and the state must approve any changes to this barrier
- Groundwater contamination is present above Chapter NR 140 enforcement standards

This letter and information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/qis/index.htm>. If the property is listed on the GIS Registry because of remaining contamination and you intend to construct or reconstruct a well, you will need prior Department approval in accordance with s. NR 812.09(4)(w), Wis. Adm. Code. To obtain approval,

Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line <http://dnr.wi.gov/org/water/dwg/3300254.pdf> or at the web address listed above for the GIS Registry.

Closure Conditions

Please be aware that pursuant to s. 292.12 Wisconsin Statutes, compliance with the requirements of this letter is a responsibility to which and any subsequent property owners must adhere. You must pass on the information about these continuing obligations to the next property owner or owners. If these requirements are not followed or if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, welfare, or the environment, the Department may take enforcement action under s. 292.11 Wisconsin Statutes to ensure compliance with the specified requirements, limitations or other conditions related to the property or this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code. The Department intends to conduct inspections in the future to ensure that the conditions included in this letter, including compliance with referenced maintenance plans are met.

Industrial Residual Soil Standards

Soil samples that are representative of remaining soil contamination on this property were collected on March 24, 1998 and June 4, 1998 and are shown on the attached map (Figure 3). The soil samples collected from the unpaved portions of the site as shown on attached Figure 7 contained petroleum compounds in concentrations that meet site-specific direct contact soil standards that were developed using industrial land use assumptions.

Therefore, pursuant to s. NR 726.05(8)(b)1., Wis. Adm. Code, this property may not be used or developed for a residential, commercial, agricultural or other non-industrial use, unless (at the time that the non-industrial use is proposed) the property owner provides notification to the Department of Natural Resources of the change in land use and an investigation is conducted, to determine the degree and extent of contamination that remains on the property, and remedial action is taken as necessary to meet all applicable non-industrial soil cleanup standards.

Cover or Barrier

Pursuant to s. 292.12(2)(a), Wis. Stats., the asphalt pavement that currently exists in the location shown on the attached map (Figure 7) shall be maintained in compliance with the **attached maintenance plan** in order to prevent direct contact with residual soil contamination that exceeds site specific industrial soil standards that might otherwise pose a threat to human health and to minimize the infiltration of water to prevent additional groundwater contamination that would violate the groundwater quality standards in ch. NR 140, Wis. Adm. Code.

If soil exceeding generic residual contaminant levels shown on Figure 7 is excavated in the future, the property owner at the time of excavation must sample and analyze the excavated soil to determine if residual contamination remains. If sampling confirms that contamination is present, the property owner at the time of excavation will need to determine whether the material is considered solid or hazardous waste and ensure that any storage, treatment or disposal is in compliance with applicable statutes and rules. In addition, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard and as a

result, special precautions may need to be taken during excavation activities to prevent a health threat to humans.

The attached maintenance plan and inspection log are to be kept up-to-date and on-site. Please submit the inspection log to the Department only upon request.

Prohibited Activities

The following activities are prohibited on any portion of the property where [pavement, a building foundation, soil cover, engineered cap or other barrier] is required as shown on the attached Figure 7, unless prior written approval has been obtained from the Wisconsin Department of Natural Resources: 1) removal of the existing barrier; 2) replacement with another barrier; 3) excavating or grading of the land surface; 4) filling on capped or paved areas; 5) plowing for agricultural cultivation; 6) construction or placement of a building or other structure.

Residual Groundwater Contamination

Groundwater impacted by petroleum contamination greater than enforcement standards set forth in ch. NR140, Wis. Adm. Code, is present on this contaminated property. For more detailed information regarding the locations where groundwater samples have been collected (i.e., monitoring well locations) and the associated contaminant concentrations, refer to the Remediation and Redevelopment Program's GIS Registry at the RR Sites Map page at <http://dnr.wi.gov/org/aw/rr/gis/index.htm>.

Vapor Migration

In addition, depending on site-specific conditions, construction over contaminated materials may result in vapor migration of contaminants into enclosed structures or migration along newly placed underground utility lines. The potential for vapor inhalation and means of mitigation should be evaluated when planning any future redevelopment, and measures should be taken to ensure the continued protection of public health, safety, welfare and the environment at the site.

Dewatering Permits

The Department's Watershed Management Program regulates point source discharges of contaminated water, including discharges to surface waters, storm sewers, pits or to the ground surface. This includes discharges from construction related dewatering activities, including utility and building construction.

Based on the concentrations of contaminants remaining in groundwater at this location, it appears likely that dewatering activities would require a permit from the Watershed Management Program. If you or any other person plan to conduct such activities, you or that person must contact that program, and if necessary, apply for the necessary discharge permit. Additional information regarding discharge permits is available at <http://www.dnr.state.wi.us/org/water/wm/www/>

Mr. Cliff Jacobson
Page 4
June 18, 2009

Post-Closure Notification Requirements

In accordance with ss. 292.12 and 292.13, Wis. Stats., you must notify the Department before making changes that affect or relate to the conditions of closure in this letter. For this case, examples of changed conditions requiring prior notification include, but are not limited to:

- Development, construction or other changes, including zoning changes, that change the land use from industrial to non-industrial
- Disturbance, construction on, change or removal in whole or part of the pavement barrier that must be maintained over contaminated soil

Please send written notifications in accordance with the above requirements to the Remediation and Redevelopment program at the WDNR Southeast Region Office at the letterhead address to the attention of Victoria Stovall, Environmental Program Associate.

Section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement. If there is equipment purchased with PECFA funds remaining at the site, contact the Commerce PECFA Program to determine the method for salvaging the equipment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this closure decision or anything outlined in this letter, please contact Nancy Ryan at (414) 263-8533.

Sincerely,

Frances M. Koonce, Sub-Team Supervisor
Southeast Region Remediation & Redevelopment Program

CAP MAINTENANCE PLAN
N59 W 14601 Bobolink Avenue
Menomonee Falls, Wisconsin
DNR BRRTS # 03-68-176464
June 16, 2009

This Cap Maintenance Plan (the "Plan") has been prepared in accordance with ch. NR 724.13(2) Wis. Adm. Code, and shall be applicable to the Property located at N59 W14601 Bobolink Avenue in the Village of Menomonee Falls, Wisconsin (the "Property").

A copy of this Plan shall be kept on file with the current Property owner and its successors. This Plan has been developed for the existing asphalt ground surface at the Property that is serving as a direct contact barrier ("Cap") for residual soil impacts at the Property.

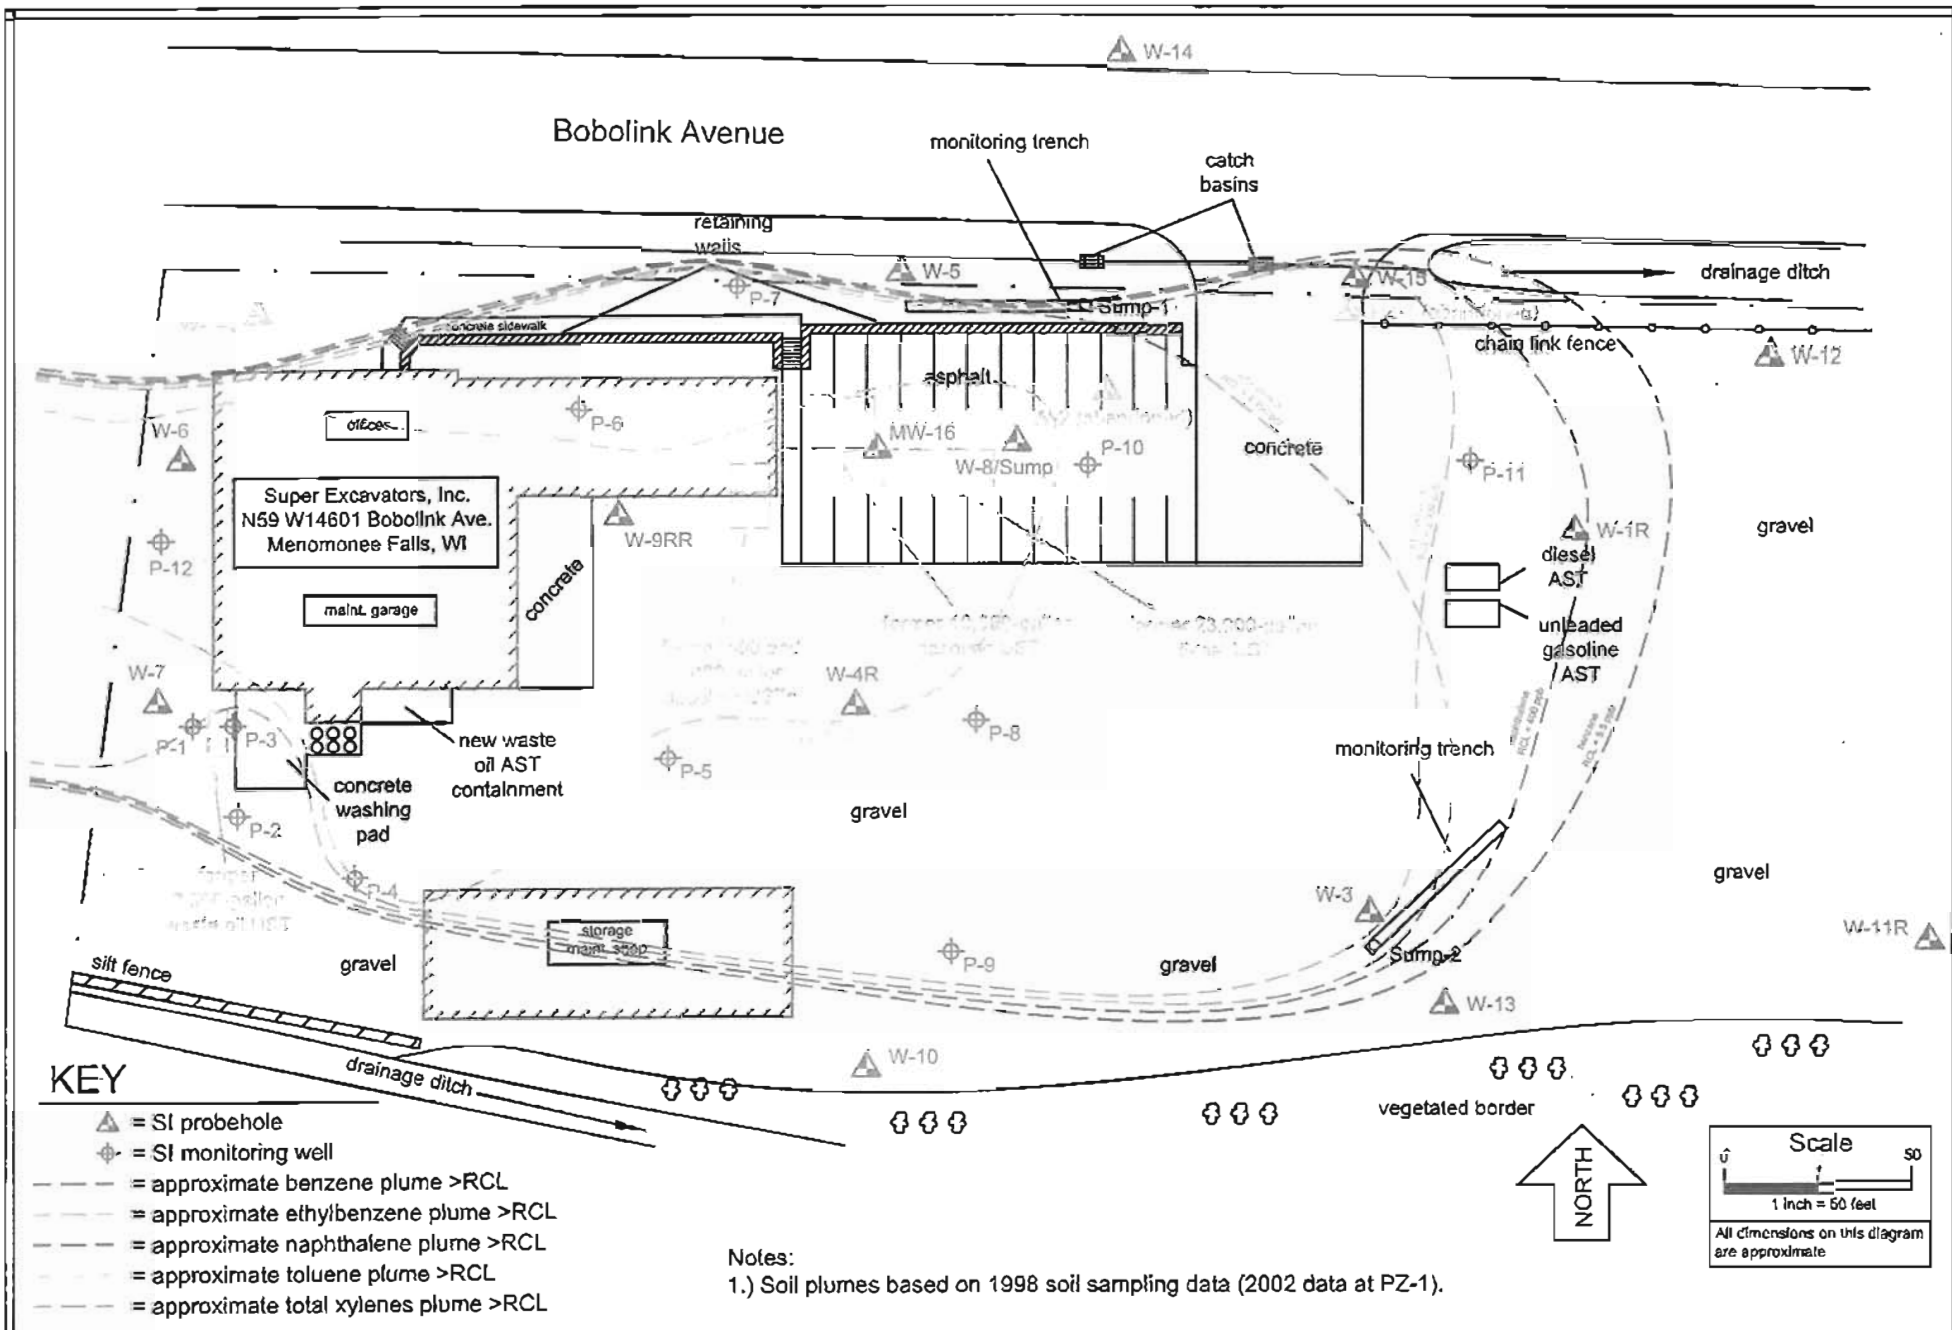

1. Property Owner. Super Excavators, Inc. c/o Mr. Cliff Jacobson, N59 W 14601 Bobolink Avenue, Menomonee Falls, WI 53051, (262) 252-3200.
2. Consultant. Environmental & Development Solutions, Inc., 6637 North Sidney Place, Milwaukee, Wisconsin 53209. Trenton Ott, Project Manager - (414) 228-9810.
3. Property Information. N59 W14601 Bobolink Avenue, Village of Menomonee Falls, Wisconsin. The Property location and features are illustrated on the attached Exhibits A and B.
4. Nature and Extent of Contamination. One diesel and three gasoline underground storage tanks (USTs) were removed from the Property and site investigation (SI) activities have been conducted. The SI results indicated the presence of petroleum volatile organic compounds (PVOCs) in soils and groundwater at the Property that are above DNR standards. The ground surface above the former UST cavity is comprised of asphalt paving that is acting as a Cap to residual soil impacts within the top four feet that are above the calculated industrial site specific residual contaminant levels (SSRCLs). The maintenance activities relate to the existing paved surface occupying an area over the contaminated soil on site. The location of the paved surface to be maintained in accordance

with this Plan is identified on the attached Exhibit B. The extent of residually impacted soil is identified on the attached Exhibit C and the extent of the groundwater plume is identified on the attached Exhibit D.

5. Normal Operation and Maintenance – Ch. NR 724.13(2)(b). Per a condition of closure, the Cap must be maintained at the Property. The Cap will be inspected once a year, normally in the spring after the snow and ice are melted. The inspection will be documented on the attached inspection log (Exhibit E). Any disturbances of the Cap noted during the inspection, such as significant cracking, burrowing or other damage will be repaired within a reasonable period of time after discovery. In the event that necessary maintenance activities expose the underlying soil, the property owner must inform maintenance workers of the direct contact exposure hazard and provide them with appropriate personal protection equipment (PPE). Any alterations or repairs to the Cap shall be documented on the attached inspection log, and the documentation shall be kept on file by the Property owner with a copy of this Plan. A copy of this Plan and any additions to the Plan shall be made available for inspection by representatives of the DNR and all interested parties (i.e. employees, contractors, future property owners, etc.) upon reasonable requests during normal business hours of the Property owner.

6. Cap Removal and Replacement. If it becomes necessary or desirable to remove or alter the existing cap, the cap so removed or altered shall be replaced with another equivalent barrier, and shall be maintained on the Property in compliance with this Plan. If impacted materials are excavated from the Property during the cap removal/alteration, the property owner must inform workers of the direct contact exposure hazard and provide them with appropriate personal protection equipment (PPE) and the materials will require proper handling and/or disposal in accordance with applicable State of Wisconsin regulations.

7. Plan Amendment or Withdrawal. This Plan can be amended or withdrawn by the Property owner or its successors with the written approval of the DNR.

*Names of persons signing in any capacity must be typed or printed below their signature

Purchaser promises to pay when due all taxes and assessments levied on the Property or upon Vendor's interest in it and to deliver to Vendor on demand receipts showing such payment.

Purchaser shall keep the improvements on the Property insured against loss or damage... by Vendor, in the sum of \$12,500.00... but Vendor shall not require coverage in an amount more than the balance owed under this Contract.

Purchaser covenants not to commit waste nor allow waste to be committed on the Property, to keep the Property in good tenable condition and repair, to keep the Property free from liens superior to the title of this Contract, and to comply with all laws, ordinances and regulations affecting the Property.

Vendor agrees that in case the purchase price with interest and other moneys shall be fully paid and all conditions shall be fully performed at the time and in the manner above specified, Vendor will on demand, provide and deliver to the Purchaser, a Warranty Deed, in the sample, of the Property, free and clear of all liens and encumbrances, except any liens or encumbrances created by the act or default of Purchaser, and except: Municipal and zoning ordinances, recorded easements for public utilities, recorded building and use restrictions and covenants, assessments, covenants and restrictions of record, and general taxes for 1985 and subsequent years.

Purchaser agrees that time is of the essence and (a) in the event of a default in the payment of any principal or interest which continues for a period of 30 days following the specified due date or (b) in the event of a default in performance of any other obligation of Purchaser which continues for a period of 60 days following written notice thereof by Vendor... Vendor may, at his option, terminate this Contract and Purchaser's rights, title and interest in the Property and recover the Property back through strict foreclosure with any equity of redemption to be conditioned upon Purchaser's full payment of the entire outstanding balance, with interest thereon from the date of default at the rate in effect on such date and other amounts due hereunder...

Upon the commencement or during the pendency of any action of foreclosure of this Contract, Purchaser consents to the appointment of a receiver of the Property, including homestead interest, to collect the rents, issues, and profits of the Property during the pendency of such action, and such rents, issues, and profits when so collected shall be held and applied as the court shall direct.

Purchaser shall not transfer, sell or convey any legal or equitable interest in the Property (by assignment of any of Purchaser's rights under this Contract or by option, long-term lease or in any other way) without the prior written consent of Vendor unless either the outstanding balance payable under this Contract is first paid in full or the interest conveyed is a pledge or assignment of Purchaser's interest under this Contract solely as security for an indebtedness of Purchaser.

Vendor shall make all payments when due under any mortgage outstanding against the Property on the date of this Contract (except for any mortgage granted by Purchaser) or under any note secured thereby, provided Purchaser makes timely payment of the amounts then due under this Contract. Purchaser may make any such payments directly to the Mortgagee if Vendor fails to do so and all payments so made by Purchaser shall be considered payments made on this Contract.

Vendor may waive any default without waiving any other subsequent or prior default of Purchaser. All terms of this Contract shall be binding upon and inure to the benefits of the heirs, legal representatives, successors and assigns of Vendor and Purchaser. (If not an owner of the Property the spouse of Vendor for a valuable consideration joins herein to release homestead rights in the subject Property and agrees to join in the execution of the deed to be made in fulfillment hereof.)

Dated this 1st day of January, 1985.

This Deed, made between Linda Bauer Trust Grantor, and Super Excavators, Inc. Grantee.

Grantor quit claims to Grantee the following described real estate in Waukesha County, State of Wisconsin (if more space is needed, please attach addendum):

A 7.3% interest Lot 7, block 3, Bowling Green Industrial Park, being a part of the Northeast 1/4 of the Southeast 1/4 of Section 26, Township 8 North, Range 20 East, Village of Menomonee Falls, Waukesha County, Wisconsin

Together with all appurtenant rights, title and interests.

RE: Site Closure with GIS Registry for the Super Excavators Property Located at
N59 W14601 Bobolink Avenue in Menomonee Falls, Wisconsin — EDS
Project No. 050303, DNR BRRTS No. 03-68-176464, FID No. 268177910,
Commerce No. 53051-5990-01

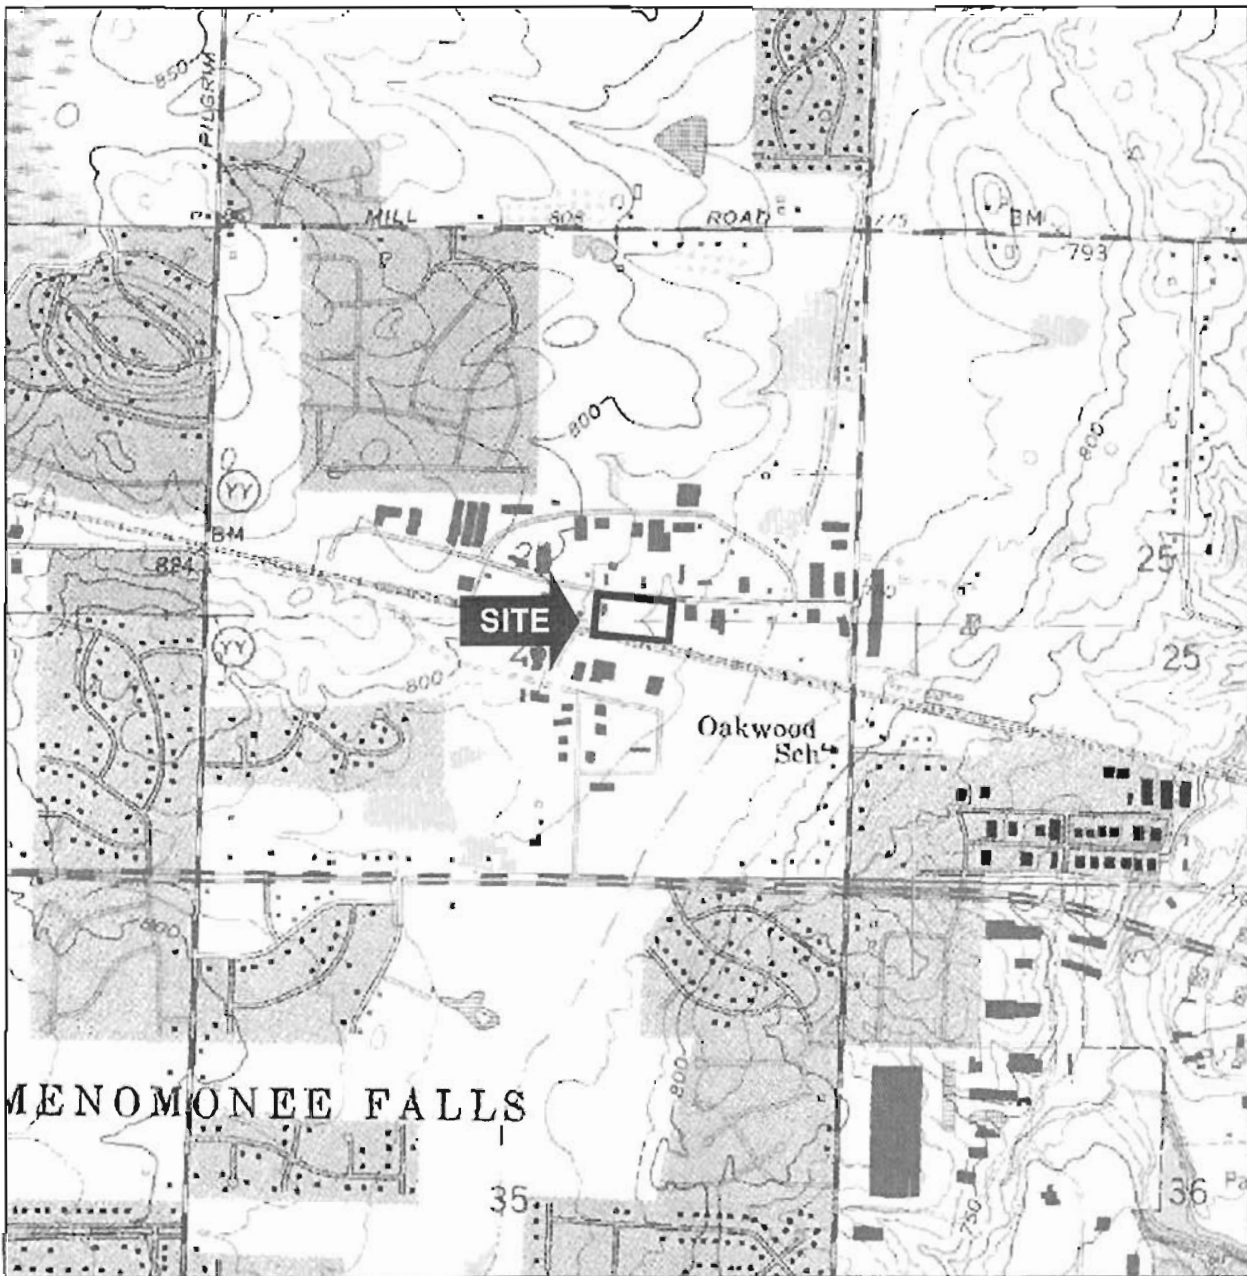

Dear Ms. Ryan:

The Super Excavators property is located at N59 W 14601 Bobolink Avenue in Menomonee Falls, Wisconsin. I have provided the necessary information in order to obtain site closure with placement of the property on the DNR's soil and groundwater GIS registries. To the best of my knowledge, I believe that the legal descriptions attached to this statement are complete and accurate.

Respectfully,

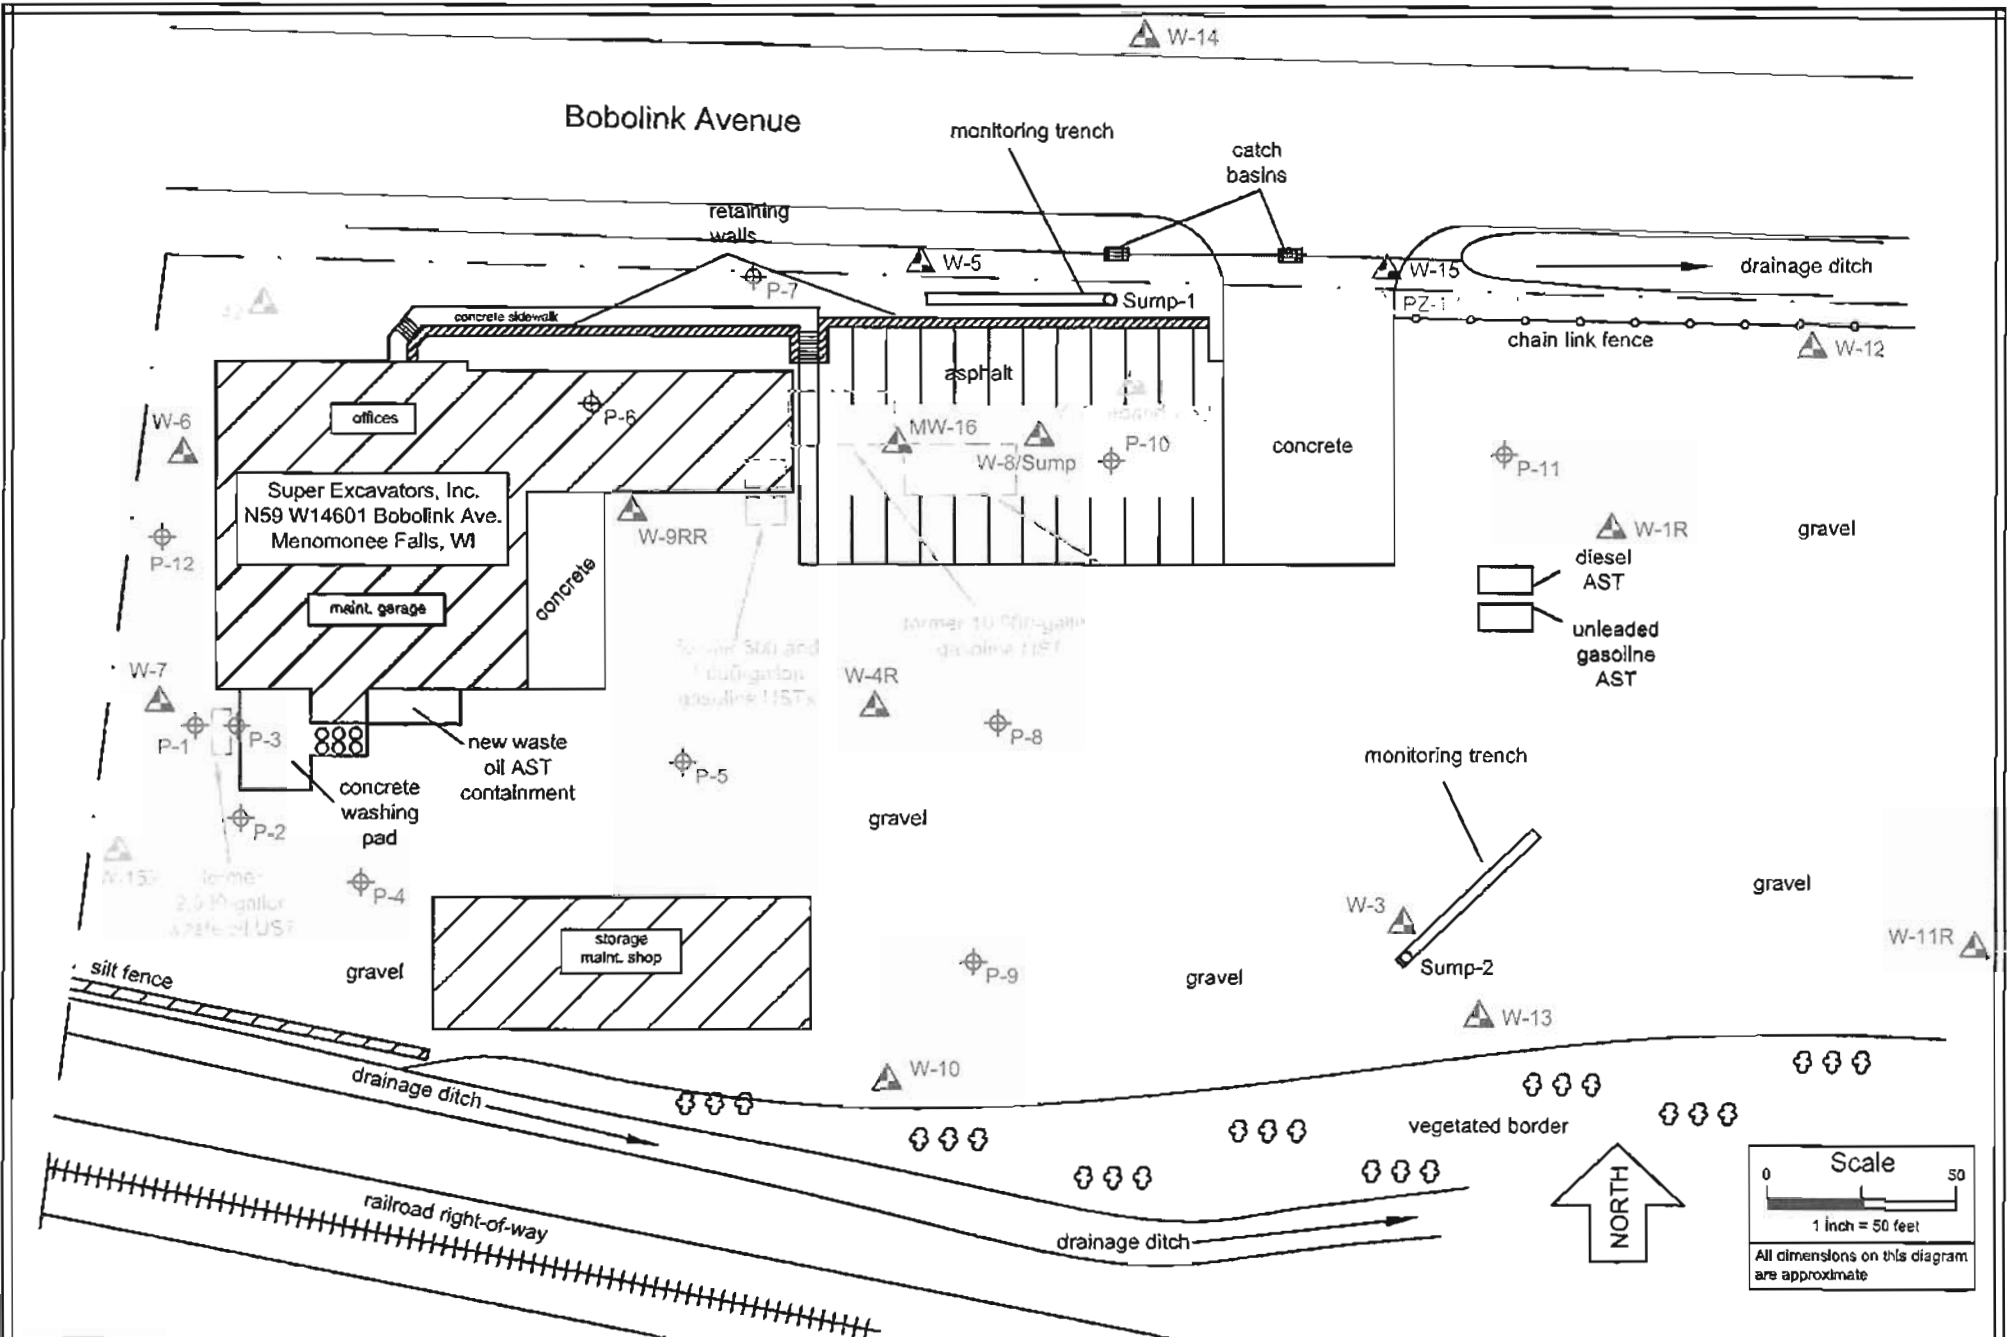

A handwritten signature in black ink, appearing to read "Cliff Jacobson".

Mr. Cliff Jacobson

	8/30/2006				8.62	9.14	93.36

*Measured from the north rim of the top of well casing.

**Well has been replaced or repaired and not resurveyed

All measurements are presented in feet.

Benchmark: Elevations referenced to a benchmark assigned an arbitrary elevation of 100.00 feet.

Note: For a list of abbreviations used in this table, see the "Guide to Abbreviations in Laboratory

Data Tables" provided at the beginning of this appendix.

BC Depth below well casing

BGS Depth below ground surface
