Louisville, KY 40207

Subject: Enclosures for the March 9, 2004 Letter

Dear Mr. Wiseman:

Accompanying this letter you will find the enclosures that were referenced in the Wisconsin DNR's March 9, 2004 letter to you, but inadvertently omitted.

Please refer to the March 9, 2004 letter, specifically the Steps to Take item. Because the enclosures were not included at that time you have 30 days from receipt of this letter, to submit written verification that you have hired and environmental consultant. Likewise, any other timelines that were based on the March 9, 2004 letter should now be based on the date of this letter.

If you have any questions you can call me at the phone number below.

Sincerely:

Paul L. Kozol, P.E.
Remediation and Redevelopment Engineer
South Central Region
Telephone: (608) 275-3301
Enclosures

Environmental Contamination – The Basics

PUB-RR-674

January, 2002

In an industrialized society like ours, a wide variety of contaminants are released to the environment every day from residential, commercial and industrial sources. Many of these releases, also referred to as discharges, may not pose a threat to the public and the environment. However, a significant release of a contaminant/hazardous substance has the potential to impact human health or the environment. When a significant release occurs, the Wisconsin Department of Natural Resources (DNR), particularly the Remediation and Redevelopment Program (RR Program), provides oversight and assistance in making sure the public and the environment are protected.

What is the RR Program?

The RR Program becomes involved when a release of a hazardous or potentially hazardous substance occurs to the lands, waters or air in the State of Wisconsin. When a release is reported, the RR Program evaluates the severity of the release and, if necessary, ensures that the proper cleanup procedures are followed to minimize any threat to human health or the environment.

The RR Program also provides technical and regulatory assistance to public and private parties looking for information, investigating and cleaning up properties with real or perceived contamination. In certain circumstances, the DNR is required to charge a fee for technical assistance. Attention is provided to abandoned or underutilized properties, known as brownfields, in an effort to return these properties back to productive use. This effort also promotes the revitalization of blighted areas, as well as the reuse/redevelopment of properties already located in urban areas in order to preserve undeveloped land (also referred to as greenfields).

A Hazardous Substance, as defined in s. 292.01, Wis. Stats., means any substance or combination of substances, including any waste of a solid, semisolid, liquid or gaseous form which may cause or significantly contribute to an increase in the mortality or an increase in serious irreversible or incapacitating reversible illness, or which may pose a substantial present or potential hazard to human health or the environment because of its quality, concentration or physical, chemical or infectious characteristics. This term includes, but is not limited to, substances that are toxic, corrosive, flammable, irritants, strong sensitizers or explosives as determined by the DNR.

Why should I be concerned?

Not only is it a legal requirement to take necessary steps to address contamination, but contamination can have an adverse impact on human health and the environment. It can take many forms and can occur anywhere. In Wisconsin, a primary concern for environmental impacts from contamination is the degradation of groundwater quality. Soil, vapor, air and surface water contamination are also areas of concern. When a release to the environment has been identified, the DNR is mandated by state law to require response actions that are protective of human health, safety and welfare, and to restore the environment to the extent practicable.

An individual or local government may assume liability for environmental cleanups by acquiring a contaminated property. The Wisconsin Supreme Court has determined that if you own a contaminated property where contaminants are continuing to migrate, then you may be

Wisconsin Department of Natural Resources
PO Box 7921, Madison, WI 53707

responsible for cleaning it up, even if you did not cause the contamination because you are interpreted as having "possession and control" of the release.

Stressed vegetation, stained soils, odors, a sheen on the surface of water, or a strange taste to water are often obvious indicators of a potential release and/or environmental problem. In addition to these more obvious factors, historical property usage such as plating operations, dry cleaners or engine repairs could also be indicative of other not-so-obvious environmental problems. For example, a serious environmental problem that is hard to detect is leakage from an underground storage tank (UST). Unless good records are kept regarding product usage, underground leaks are hard to identify.

What is a discharge/release?

A discharge to the environment is defined in s. 292.01, Wis. Stats., and means, but is not limited to, spilling, leaking, pumping, pouring, emitting, emptying or dumping. RR staff commonly use the terms "discharge" and "release" interchangeably.

To obtain more information on what constitutes a hazardous substance and/or release, refer to the Regulations listed in the "Resources" section on page 4.

How is a release discovered?

Releases to the environment are discovered in several ways. The most common methods of discovery are: visual observation; while the release is taking place (i.e. a leaking gas pump); or historical releases discovered during building expansion/demolition, road construction activities, utility repairs or tank removal/upgrade activities.

Releases can also be discovered at the time of property transfer if a potential buyer requests a Phase I and/or Phase II Environmental Site Assessment (ESA). A Phase I ESA consists of a historical search and identifies current and past property usage and areas of potential environmental concern. A Phase II ESA consists of collecting soil and/or groundwater samples at the property from those areas identified in the Phase I ESA with suspected or known

contamination (i.e. areas of drum storage, stressed vegetation, stained soils, above and below ground storage tanks, etc.).

When do I need to report a release?

According to the "Spill Law", s. 292.11, Wis. Stats., persons who cause, possess or control the release of a hazardous substance that adversely impacts, or threatens to adversely impact public health, welfare or the environment must immediately report the release to the DNR. Generally, this responsibility falls upon the current property owner. **Emergency one time spills must be immediately reported by telephoning the DNR 24-hour toll free Spill Hotline at 1-800-943-0003.** Non-emergency releases discovered via a tank pull or site assessment can be reported by completing and submitting the Hazardous Substance Fax Notification Form (Form 4400-225) or visiting your DNR regional headquarters in person during normal business hours. (Please see page 3 for contact information.)

What happens next?

Once the DNR has been notified that contamination exists at a site, the DNR will inform the responsible party by telephone and/or mail if any further actions are needed. The range of actions is defined in the NR 700 rule series (referenced in the "Resources" section on page 4). The responsible party is then, in most cases, issued a responsible party letter that outlines legal responsibilities for addressing contamination. The letter will ask the responsible party to hire a qualified environmental consultant. The consultant will submit a work plan that details how he/she will investigate the degree and extent of the contamination (if necessary, across property boundaries) by collecting soil and/or groundwater samples.

What is a "Responsible Party?"

A responsible party is an individual or public or private entity who causes a discharge of a hazardous substance or who possesses or controls a hazardous substance which is discharged. The responsible party is legally required under Wisconsin's Spill Law to notify the DNR of the discharge and to investigate and remediate the environment.

After determining the degree and extent of the contamination, the environmental consultant will prepare a site investigation report that summarizes the results of their findings. Typically, the consultant will also provide a cleanup strategy in this report. Cleanup measures are then undertaken by the consultant on behalf of the responsible party to restore the environment.

Once the site appears to meet all regulatory requirements, the consultant will prepare a closure request for DNR submittal. Once the appropriate fee has been submitted, the DNR reviews the closure request and determines whether or not the site has been cleaned up to acceptable levels. If closure is appropriate, the DNR or any other state agency with jurisdiction over the case will issue a closure letter indicating you have complied with the conditions of closure.

What is the role of an environmental consultant?

When the DNR informs you that you need to address contamination, you will be requested to hire the services of a professional environmental consultant. The role of the environmental consultant is to determine the most appropriate and cost effective way to investigate and remediate the contaminated site. The consultant should act as a representative for the responsible party on technical matters and should have a thorough understanding of regulatory requirements. It is important to feel comfortable with your environmental consultant, as they will be working closely with you and the DNR.

Where can I find additional information?

Appointments to view paper copies of DNR information can be made by contacting your DNR regional headquarters at the telephone numbers listed below during normal business hours. Please be aware that some of our services require a fee. Please see our web site at www.dnr.state.wi.us/org/aw/rr for more information on fees.

Contacts

Northeast Region (NER, Green Bay): 920-492-5842
Northern Region (NOR, Rhinelander): 715-365-8990
South Central Region (SCR, Fitchburg): 608-275-3212
Southeast Region (SER, Milwaukee): 414-263-8688
West Central Region (WCR, Eau Claire): 715-839-2784

The RR web site has many features to assist you. For example, you can locate DNR staff contacts, access DNR publications, obtain environmental information on specific properties, or find information on financial incentives. The RR web site can be found at www.dnr.state.wi.us.org/aw/rr.

If you do not have access to the web, you can get information about the RR Program by calling the **Information Line** at **800-367-6076** (in-state long distance) or **608-264-6020** (Madison area or out-of-state long distance).

Resources

The following DNR resources can be found on the RR Program web site at: www.dnr.state.wi.us/org/aw/rr.

Selecting an Environmental Consultant

PUB-RR-502

April 2002

Why do I need a consultant?

If the Wisconsin Department of Natural Resources (DNR) has notified you that you are responsible for investigation and cleanup of soil or groundwater contamination, you need professional assistance to get the work done. Department rules establish qualifications for environmental consultants who perform this kind of work.

Site investigations and cleanup procedures can be complex and costly. A qualified environmental consultant can clean up your property in accordance with state and federal regulations, and help maintain or increase the value of your land. A good consultant will also understand your business needs, negotiate your cleanup schedule with DNR Remediation and Redevelopment Program staff and give you regular updates in understandable language.

A competent, experienced consultant can:

- ◆ save time, money, and complete the project right the first time;
- ◆ help establish a cooperative relationship with regulatory agencies; and
- ◆ minimize down time for your business.

How can I find a qualified consultant?

The DNR does not endorse environmental consultants. However, we maintain a list of consultants who have identified themselves as doing environmental work in Wisconsin (see page 4). Other means of finding or selecting a consultant include calling other businesses you know have done environmental cleanups, contacting professional associations in which you are a member, or searching the yellow pages under "environmental services" or "environmental engineers."

What should I tell a consultant?

Tell your potential consultant as much as you can about your property, including:

- ◆ the site history, including materials and products used;
- ◆ materials and wastes that have been stored, recycled or disposed of;
- ◆ potential areas of contamination;
- ◆ the source of your water supply; and
- ◆ what DNR has asked you to do.

Wisconsin Department of Natural Resources
P.O. Box 7921, Madison, WI 53707

Where can I get more information about cleanups and redevelopment?

1. Please visit the Remediation and Redevelopment (RR) Program web site at **www.dnr.state.wi.us/org/aw/rr**. We have web pages with information on cleanup, financial assistance and liability.
2. Please see our other publications. All RR Program publications may be located on the "Publications" page of our web site. Here are a few that may be of interest:
 - *Environmental Services Contractors List* (publication RR-024)
 - *Controlling UST Cleanup Costs* – This is an EPA publication available by calling 1-800-490-9198 and asking for EPA 510-F-98-008.
 - *Environmental Contamination Basics* (publication RR-674)
 - *The Financial Resources Guide for Cleanup and Redevelopment* (publication RR-539)
 - *Brownfield Basics – Tools for Cleaning Up and Redeveloping Contaminated Properties* (publication RR-663)
3. To obtain printed copies of our publications, please call the RR Program information line at 608-264-6020, or 1-800-367-6076 for in-state long distance calls.
4. For site specific information, please contact the RR Program in a DNR regional office.

INFORMATION ABOUT PECFA

WISCONSIN'S PETROLEUM ENVIRONMENTAL CLEANUP FUND ACT

PECFA PROGRAM ELIGIBILITY

WHO MAY SUBMIT A CLAIM?

The owner or operator may submit a claim.

If the responsible party is not the sole owner of the site, one individual must be established as claim submitter and award recipient. Filing a "Current Owner Assignment Certification" form (Commerce Form 5) will do this.

The owner may, with the Department's written approval, designate an "agent". The agent must agree to complete and pay for the remediation up to the point of closure, natural attenuation monitoring, operation and maintenance of a treatment system or long term monitoring. Both the owner and agent submit the claim and the award is made payable to both.

CLAIM REQUIREMENTS

To submit a claim, the claimant must do the following:

1. Register the petroleum product storage system or the home oil tank system with the Department. Any petroleum product storage tank system larger than 60 gallons must be registered with the Department.
2. Report the discharge immediately to the DNR or the Division of Emergency Government in the Department of Military Affairs.
3. Select a consulting firm through a comparison of at least three firms. **The consulting firm comparison was created for the protection of the claimant to help ensure a quality consultant is chosen. Remember: check the consultant's references**
4. The consultant must conduct the DNR required site investigation and develop a Remedial Action Plan.
- a) The remedial action plan developed for the site must include the basis for the recommendation and the projected costs to site closure.

- b) If the Department approves the remedial plan, it will establish a cap on total costs and remediation can begin. At the time of remedial action review, the claimant will also be provided an approval to submit their claim for investigation costs. If the Department does not approve the recommended remedial alternative, it may elect to bundle the site with other remedial efforts in the area or to conduct a public bid to obtain a lower remediation cost.

(NOTE: Bundling' means the process of providing investigation or remedial action services, or both, across multiple occurrences while utilizing one consulting firm or common commodity services and providers, or both, to reduce total remediation cost.)

If a bundle is constructed or a bid is conducted and the claimant elects not to use the lowest cost approach, claimant reimbursement will be limited to the lowest bid/bundle cost.

- c) During the investigation and remediation processes, a minimum of 3 bids per commodity item is required. All commodity services must be obtained after comparing a minimum of three bids from responsible providers. The lowest cost provider **shall be selected**. Consultants can only provide consulting activities and commodity services shall be provided only by entities totally independent from the consulting firm. Home heating oil tank remediations, however, are exempt from commodity bidding.
- d) The maximum allowable cost for a site investigation and the development of the remedial action plan is \$40,000. If the site investigation is anticipated to exceed the \$40,000 cap, written approval from the Department for the additional costs must be obtained prior to incurring them.
5. Initiate a claim by filling out an "Initial Claim" form that you can obtain from the Department by calling (608) 267-3753, (608) 266-2424, or writing to:

PECFA
PO BOX 7838
MADISON, WI 53707-7838

PECFA PROGRAM ELIGIBILITY

WHAT TANKS ARE INCLUDED IN THE PROGRAM?

Coverage under the PECFA program includes petroleum product storage tank systems defined as those containing gasoline, gasoline-alcohol fuel blends, kerosene, fuel oil, burner oil, diesel fuel, and used motor oil. Many underground and aboveground storage systems, including any on-site integral piping and dispensing systems, are covered. Specifically, the following systems are covered under COMM 47.02 Coverage:

- (a) Commercial tanks systems larger than 110 gallons capacity;
- (b) Heating oil tank systems where the product is sold;
- (c) Farm and residential tanks systems larger than 1,100 gallons capacity and not storing heating oil for consumptive use on the premises;
- (d) Tanks systems storing gasoline, diesel fuel, or other vehicle fuels, other than residential tanks of 1,100 gallons or less capacity;
- (e) Farm vehicle fuel systems of 1,100 gallons or less capacity, which meet additional statutory requirements regarding farm size and farm income, and are used to store products not for resale.
- (f) Heating oil tank systems owned by public school and technical college districts, supplying heating oil for consumptive use on premises.
- (g) Tank systems located on Trust Lands of an American Indian tribe if the owner or operator's tank system would be otherwise covered under (a) through (f) and the owner or operator complies with the rules promulgated in COMM 47 and COMM 10 and obtains all applicable agency approvals.
- (h) Home heating oil tank systems provided the claims are for underground tank systems and the persons comply with rules promulgated in COMM 47 and COMM 10.

Please see page 6 for actual maximum awards and deductibles for the eligible tank system listed.

Changes in the PECFA statute have also limited coverage for certain new and upgraded underground tank systems. Page 7 explains the eligibility and insurance requirements for the new and upgraded tank systems.

WHAT COSTS ARE ELIGIBLE?

The following is a listing of items eligible for reimbursement. Although the final determination of eligibility is made at the time of claim review, this list is a good guide for claimants:

1. Investigation of potential sources of petroleum contamination.
2. Preparation of a remedial action plan.
3. Laboratory testing for covered products.
4. Investigation and assessment for the degree and extent of contamination.
5. Removal of contaminated soils.
6. Costs of equipment mobilization.
7. Removal of petroleum products from surface water, groundwater, and soil.
8. Treatment and disposal of contaminated soils.
9. Monitoring to establish existence of natural cleanup progress.
10. Charges for maintenance of equipment used for petroleum product recovery and remedial action.
11. State or municipal permits for installation of remedial equipment.
12. Actual costs for the purchase or rental of temporary building structures to house remedial equipment.
13. Restoration or replacement of a private or public potable water supply.
14. Contractor or subcontractor costs for remedial action.
15. Actual costs for travel and lodging within state rates.
16. Fees up to \$500 for progress payment or final claim preparation.
17. Compensation to third parties for bodily injury and property damage due to a petroleum product discharge from underground storage tank systems.

WHAT COSTS ARE IN-ELIGIBLE?

The following is a listing of items in-eligible for reimbursement. Although the final determination of eligibility is made at the time of claim review, this list is a good guide for claimants.

1. Remedial costs incurred on or before August 1, 1987.
2. Any costs submitted without absolute proof of payment.
3. Costs of petroleum transportation equipment spill clean-ups.
4. Costs for work performed before the Department of Natural Resources is notified of a release.
5. Overtime labor charges, except for approved emergency actions.
6. Used-oil remediation costs not from internal combustion engines.
7. Investigation or remedial action costs for sites outside of Wisconsin.
8. Costs associated with environmental audits, real estate transactions, construction projects, or long-term loan transactions.
9. Costs for investigations to locate petroleum product storage systems or home oil systems to determine if a tank is eligible for PECFA.
10. Tank emptying, cleaning, disposing, removing, and closing costs after November 1, 1991.
11. Laboratory rush charges, priority mail, or priority shipping fees, unless related to an approved emergency action.
12. Air travel.
13. Costs incurred after DNR or Commerce determines no further action is needed, except for abandonment of monitoring wells and site closure.
14. Costs not integral to the remediation of a petroleum product discharge.
15. Incompetent or ineffective clean-up costs which were not based upon sound professional and scientific judgment.
16. Costs of redoing incomplete or incompetent remedial action work.
17. Costs or rework on remedial action sites or systems to accommodate construction upgrades, retrofits, or redevelopment projects.
18. Costs above those necessary to bring a site to the required level of remediation.
19. Costs to fix or replace damaged buildings, sewer lines, water lines, electrical lines, phone lines, fiber optic lines, or other utilities on the property.
20. Costs of reinstalling damaged remedial equipment and reinstalling or modifying remedial equipment for purposes other than effective remediation.
21. Interest costs accrued due to improper or incomplete filing of claims or a lack of response to Department requests for additional information, except if delayed by DNR or Commerce processes.
22. Late service fees or costs related to invoices or bills for which payment verification is unobtainable.
23. Costs for sampling and testing for heavy metals, except lead when the discharge is from a leaded gasoline system or lead and cadmium when the source is used motor oil.
24. Costs associated with the analysis of inappropriate constituents not associated with an eligible petroleum product.
25. Costs associated with full VOC testing after the investigation phase, unless required by the DNR for monitoring PECFA eligible products and the DNR letter documenting the requirement is submitted with the claim.

WHAT COSTS ARE IN-ELIGIBLE?

1. Costs of repairing, retrofitting, or replacing a petroleum product storage system or home oil tank system such as, but not limited to, tank bedding materials or fill for setting tanks, lines, or canopies.
2. Costs associated with capital improvements, reinstallation of electrical, dispensers, pumps, or other items for retrofits, upgrades, or new construction.
3. Costs for remedial action activities funded under 42 US 6991, unless the owner or operator or the person owning the home oil tank system repays the funds provided under 42 USC 6991.
4. Expenditures required by the DNR or the Department in order to meet the groundwater protection standard, ch. 160, Stats., ch. COMM 10 or other administrative rules but not related to a petroleum product discharge under this chapter.
5. Costs associated with loss of business.
6. Costs associated with the razing of buildings, removal of roads, removal of footings and foundations, destruction of structures or other redevelopment costs.
7. Costs associated with loss of interest or dividends, or interest costs from a loan other than for remediation.
8. Costs associated with cement, blacktop replacement, on-site landscaping, or other improvements, except for depreciated values in third-party actions.
9. Costs associated with the closure of a tank system.
10. Costs associated with tank closure assessments.
11. Costs of removing tank systems that have previously been closed in-place with inert materials, sand, pea gravel, water, or other substances.
12. Costs associated with the abandonment of wells not related to the remedial action.
13. Costs, other than costs for compensating third parties for bodily injury and property damage, which the Department determines to be unreasonable or unnecessary to carry out the remedial action activities.
14. Costs associated with third-party actions by adjoining property owners for the installation of monitoring wells or other clean-up related items unless a court judgment has been obtained.
15. Costs associated with third-party damages from a discharge originating from an aboveground storage tank.
16. Attorney fees associated with third-party actions.
17. Any costs associated with an appeal of a determination specific to the scope of COMM 47.
18. Attorney fees including, but not limited to, legal advice, appeals, or other representation on behalf of the responsible party or agent.
19. Supervisory or management costs when a municipality or company uses its own personnel or personnel from a wholly or partially owned subsidiary for remedial activities.
20. Costs for supervisory or management activities conducted by owners or operators.
21. Costs for right-of-entry or trespass fees.
22. Separate vehicle and mileage costs.
23. Costs determined by the Department to be excessive.
24. Subcontractor mark-ups for work performed after 1/31/93.
25. Costs associated with general program support and office operation which are expected to be included in the hourly staff rates (i.e. copies).
26. Costs reimbursed by insurance companies unless performing in an agent role.

Petroleum Environmental Cleanup Fund Award (PECFA) Program -- Maximum Awards, Total Annual Awards and Deductibles

Type of Tank	Owner	For Sites where the investigation is started before 12/22/2001			For Sites where the investigation is started on or after 12/22/2001		
		Maximum Award Per Occurrence	Total Annual Awards	Deductible ⁽²⁾	Maximum Award Per Occurrence	Total Annual Awards	Deductible ⁽²⁾
Home Heating Oil	All	\$7,500	N/A	25% of eligible costs ⁽³⁾	No Change	No Change	No Change
Under-ground	Non-Marketer (the system does not store products for resale and handles 10,000 or less gallons per month)	\$500,000	\$1,000,000 ⁽⁴⁾	\$2,500 plus 5% of eligible costs, but not more than \$7,500 per occurrence. For claims where an acceptable RAP is received on or after 11/1/99. The deductible is \$2500 plus 5%. ⁽⁵⁾	\$190,000	\$190,000	\$10,000 per occurrence
Under-ground	Marketer (the system stores products for resale) or Non-marketer with system that handles more than 10,000 gallons per month	\$1,000,000	\$1,000,000 ⁽⁴⁾	\$2,500 plus 5% of eligible costs, but not more than \$7,500 per occurrence. For claims where an acceptable RAP is received on or after 11/1/99. The deductible is \$2500 plus 5%. ⁽⁵⁾	\$190,000	\$190,000	\$10,000 per occurrence
Above-ground	The system does not store products for resale and handles 10,000 or less gallons per month	\$500,000	\$1,000,000 ⁽⁴⁾	\$15,000 plus 2% of eligible costs over \$200,000 ⁽⁵⁾	\$190,000	\$190,000	\$10,000 per occurrence
Above-ground	The system stores products for resale or handles more than 10,000 gallons per month	\$1,000,000	\$1,000,000 ⁽⁴⁾	\$15,000 plus 2% of eligible costs over \$200,000 ⁽⁵⁾	\$190,000	\$190,000	\$10,000 per occurrence
Farm	Underground and aboveground vehicle fuel systems of 1,100 gallons or less storing products not for resale	\$100,000	\$100,000	\$2,500 plus 5% of eligible costs, but not more than \$7,500 per occurrence	No Change	No Change	No Change
Public School District and Technical College District	Heating oil for consumptive use on premises	\$190,000	\$190,000	25% of eligible costs	No Change	No Change	No Change

- (1) Maximum award in effect before December 22, 2001, applies to all eligible costs for investigations and remedial activities started before December 22, 2001.
- (2) COMMERCE may waive the deductible if it determines that the owner or operator is unable to pay. If COMMERCE waives the deductible, COMMERCE shall file a lien against the property until the lien is paid.
- (3) Nonprofit housing organizations are exempt from paying the deductible for tanks owned by the organization if they assist low-income persons with housing related problems.
- (4) \$2,000,000 maximum annual award if the claimant owns or operates more than 100 petroleum product storage tank systems.
- (5) For a "terminal" (a petroleum product storage system that is connected to a pipeline facility), the deductible is \$15,000 plus 5% of the amount by which eligible cost exceed \$200,000. For a terminal where the RAP is received after 11/1/99 the deductible is \$15,000 plus 10% of the amount by which eligible costs exceed \$200,000.
- (6) The change in deductible first applies to a person who submits a remedial action plan, that is acceptable to the department of Commerce or DNR on November 1, 1999.

PECFA COVERAGE FOR NEW AND UPGRADED SYSTEMS

TANK SYSTEM TYPE:	SITE CONDITION:	OLD CONTAMINATION COVERED?	INSURANCE REQUIRED FOR:	INSURANCE WHEN?
<u>NEW UNDERGROUND SYSTEM</u>	CLEAN OR CONTAMINATED	YES, IF CONTAMINATION CONFIRMED BEFORE 1/1/96	NEW RELEASES FROM SYSTEM AFTER 1/1/96	REQUIRED 1/1/96
<u>UPGRADED UNDERGROUND SYSTEM</u> (see note 1)	CONTAMINATED AT TIME OF UPGRADE	YES, IF CONTAMINATION CONFIRMED BEFORE UPGRADE IS COMPLETED OR BEFORE 1/1/96	NEW RELEASES FROM SYSTEM WHEN CONFIRMED AFTER BOTH UPGRADE AND 1/1/96	REQUIRED ON 1/1/96, IF UPGRADED BEFORE THAT DATE, OR AFTER UPGRADE IF WORK IS COMPLETED AFTER 1/1/96 (see note 2)
<u>UPGRADED UNDERGROUND SYSTEM</u> (See note 1)	CLEAN AT TIME OF UPGRADE	NOT APPLICABLE	NEW RELEASES FROM SYSTEM WHEN CONFIRMED AFTER BOTH UPGRADE AND 1/1/96	REQUIRED ON 1/1/96, IF UPGRADED BEFORE THAT DATE, OR AFTER UPGRADE IF WORK IS COMPLETED AFTER 1/1/96 (see note 2)
<u>NEW ABOVEGROUND SYSTEM</u>	CLEAN OR CONTAMINATED	YES, IF CONTAMINATION CONFIRMED BEFORE 12/23/2001	INSURANCE IS NOT MANDATED, BUT NEW RELEASES FROM SYSTEM WHEN CONFIRMED AFTER 12/22/2001 WILL BE THE RESPONSIBILITY OF THE OWNER	
<u>UPGRADED ABOVEGROUND SYSTEM</u>	CLEAN AT TIME OF UPGRADE	NOT APPLICABLE	INSURANCE IS NOT MANDATED BUT NEW RELEASES FROM SYSTEM WHEN CONFIRMED AFTER 12/22/2001 WILL BE THE RESPONSIBILITY OF THE OWNER	
<u>UPGRADED ABOVEGROUND SYSTEM</u>	CONTAMINATED AT TIME OF UPGRADE	YES, IF CONTAMINATION CONFIRMED BEFORE UPGRADE IS COMPLETED	INSURANCE IS NOT MANDATED BUT NEW RELEASES FROM SYSTEM WHEN CONFIRMED AFTER 12/22/2001 WILL BE THE RESPONSIBILITY OF THE OWNER	

NOTE 1: An upgraded system, by definition is a system that has all of the following: Corrosion protected tank(s), Corrosion protected line(s), Spill containment devices, and Overfill devices.

NOTE 2: If a system is upgraded after 12/31/93, and the owner or operator applies for private insurance within 30 days, a 90 day tail on PECFA coverage is provided for the upgraded system(s).
