Janet, that is fine. Thank you for reviewing this quickly.

Since we have to schedule the drilling events weeks in advance, it is difficult to cancel it because of a rain event, especially with the sunset date of PECFA coming soon. We did have several issues with the drilling in 2016, and did have to cancel it several times, but I don't think it would have mattered what time of year we did the testing, and you know how hard it is to judge the forecast 😊.

We tried to use mats to drill on the neighbors property, but it just didn't help. We were going to place the well closer to MW-1 for Speaker, but there were overhead lines limiting us again. I just wanted to let you know we do try to take the weather into consideration, but sometimes it is very difficult to cancel with such a late notice. Thank you for taking this into consideration. Again, I appreciate your assistance with this project.

Please call me with any questions.

*Lynn M. Bradley*

Hi Lynn and Brian,

I have reviewed your bid deferral and variance request for Speaker Property. PECFA will not approve the Change Order request (task 36) but will approve a Regulatory Correspondence (task 7). PECFA will not approve the variance for GEC client and contractor coordination.

In 2016 we had a similar situation at Speaker where dirt was needed to repair ruts from drilling. This property is one where you need to be aware of time of year and weather conditions as the ground gets soft, mushy, and difficult to work on without causing damage. We discussed this in 2016.

The forecast this coming weekend calls for rain. Please be advised to consider this as you plan to drill the second well next week and plan accordingly.

Once I hear back from you that you concur, I will finalize my approval.

Janet,

Yes, the driller used mats. With the amount of rain they got, it still left terrible ruts  
We used Badger State Drilling out of Stoughton.

Please let me know if you need any further information. Thank you!

Brian,

I have two questions.

1. Did the driller use matts?
2. Who are you using as your driller?

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
