Janet,

Per our telephone conversation, we are preparing an updated map indicating the location of the Underground Storage Tank System and dispensers. We also re-drew the retaining wall and driveway that extends to the garage in the lower level. When reviewing the data, I compared the locations of the soil probes performed in 2010 that were included on the map, with my field notes. The soil probes were not located in the correct locations. The site conditions are so different now since 2010. A large amount of shrubs and trees have been removed from the property. This being said, Brian is preparing an updated map with the updated features, including the correct location of the previous soil probes, and a proposed scope of work for soil probes. This will likely be e-mailed to you tomorrow with a hard copy sent in the mail. I want to thank you for sending us the aerial photographs and also the tank closure assessment, this has really helped in determining the source area (tank system on top of the retaining wall) and cause of this problem. Please let Brian or myself know if you have any questions. The best number to reach me at is 608-617-7729.
