Subject: Waubeka Mill Closure Review - 03-46-183691

Ron and Jason,

On November 26, 2019, the Waubeka Mill Closure Request was reviewed. The review comments are as follows:

1. Remove the delineation of contamination at G-3, as lead is below the Background Threshold Value. Revise the cross-section and soil figure to reflect the revision.
2. Add the Background Threshold Value for lead as a reference to the soil data table.
3. The groundwater monitoring well can be properly abandoned and the abandonment form submitted.

The closure review will be paused until the above is completed.

Lee

We are committed to service excellence.
