Subject: Old Dutchmill SI Report Received

Hello Joe,

On July 3, 2019, the DNR received the Site Investigation Report for WI DOT - Old Dutchmill located at N2271 STH USH per BRRTS 45, Town of Auburn, WI (BRRTS # 03-20-183944). Based on our review, the extent of soil and groundwater contamination appears to be adequately defined. DNR still has concerns that there is a potential for vapor intrusion as groundwater with concentrations above Wis. Admin. Code § NR 140 PAL is likely in contact with the building's foundation. It would be helpful if you could provide more information about the depth and condition of the basement foundation, depth and location of drain tile, and location of any subsurface utilities (to be added to site maps). This will give a better understanding of risk for vapor intrusion.

The purpose of this email is also to inform you of a change in DNR project manager for your site. Effective immediately, all correspondence, reports, and submittals concerning the above site should be sent to the following address:

Wisconsin Department of Natural Resources
Attn: Kristina Femal
Remediation and Redevelopment Program
2984 Shawano Ave
Green Bay, WI 54313-6727

Let me know if there is anything you would like to discuss further.

Warm Regards,
Kristina

We are committed to service excellence.
